SWAROVSKI MANUFAKTUR

CRYSTAL ATELIER OF THE 21ST CENTURY

Swarovski is committed to continue a 120-year spirit of innovation. In Wattens, Austria, the cradle of Swarovski, the vision of creating the Crystal Atelier of the future now became reality. It indicates a new way of developing crystal innovations, in a space for inspiration and co-creation: In the Manufaktur, Swarovski exclusively together with its clients, indulges in a 21st-century art of creating crystal innovations and of transforming ideas and dreams into real crystal objects. Thanks to the physical proximity of creators, developers and craftsmen, unique crystal designs and applications are rapidly co-created from scratch.

CRYSTAL WORKSHOPS OF THE FUTURE

There is a tangible energy evident in what is going on in Wattens, with the Manufaktur being just one of three major developments to be undertaken by 2020. A new crystal-cutting center, "the crystal factory of the future" as Markus Langes-Swarovski, Member of the Swarovski Executive Board and visionary behind the projects, describes it – is due to be operational in 2019. Campus 311, an innovation and product development center has been opened in spring this year and completes the huge investment in the Wattens site.

SWAROVSKI MANUFAKTUR: AN EMOTIONAL EXPERIENCE

The Manufaktur is reached by a newly constructed footbridge from Campus 311. "You pass through a central staircase, which is created from dark materials, with black steel and a dark terrazzo flooring," explains Kjetil Trædal Thorsen, founding partner of the Norwegian architects Snøhetta, responsible for the Manufaktur. "A sliding door opens and you experience an amazing and inspiring moment as you step into this very bright and light-filled space from a slightly declining floor across the bridge. Entering the Manufaktur is really an exceptionally emotional experience."

SPACE FOR INSPIRATION AND CO-CREATION

The Manufaktur is a vast hangar-like space; radiant with natural daylight beaming through its glass roof, with clear sightlines in every direction. There is virtually no obvious means of ceiling support and walking into the new building it feels as if you are stepping into the future. When a client arrived from India recently to work on one of the earliest projects to take place at the Manufaktur, she was overwhelmed. "As she left, she said, 'I have no words, just emotions,'" recalls Langes-Swarovski. "It is that kind of reaction that represents the size and impact of the whole of Swarovski. Many people will only understand who they are actually dealing with after they see the new building", adds Thorsen.

Swarovski has worked with Snøhetta before. They were the architects of the play tower at Swarovski Crystal Worlds, built in 2015. With offices in Oslo and New York and studios in Innsbruck and several other cities around the world, the architectural practice has a portfolio of large, ambitious structures, including museums, libraries, office and residential complexes, and the Oslo Opera House for which they won the 2009 Mies van der Rohe Award. The new structure for Swarovski, which covers close to 8,000 square meters over three levels, is a consistent addition to Snøhetta's catalog of projects.

SKILLS AND CAPABILITIES DIRECTLY ACCESSIBLE TO CLIENTS

While the Manufaktur, described by Langes-Swarovski as "the atelier of the 21st century", sits on the company's foundations within the grounds of the existing family-run factory, it also represents new possibilities for the global creative brand. As Langes-Swarovski explains: "The uniqueness of the Manufaktur is that it brings existing skills and capabilities under one spectacular roof, making them directly accessible to our clients. It is a space for inspiration and co-creation that enables them to transform their ideas into real crystal objects in a very short period of time – not just digital twins or plastic 3D-printed copies, but actual crystal creations with their true sparkle, touch and feel."

While the focus is on future collaborations and, as Langes-Swarovski puts it, "serendipity and a much higher hit rate for coincidences", the first project at the building was for Swarovski itself – 30 different crystal designs, involving 300 pieces, for the Atelier Swarovski home collection. "It represented what will be a typical Manufaktur project," explains Langes-Swarovski. "Our Crystal Prototyping Team produced the special crystal cuts and shapes within just a few days and our Special Projects Team skillfully combined them with marble, wood and metal components. The pieces were featured in Milan at the Salone del Mobile earlier this year." Some of the cutting-edge technology at the new building incorporates the ability to create Wave Cut convex or concave shapes, and large crystal objects up to 80cm in diameter.

CHANGING THE WAY WE INNOVATE

Snøhetta's architectural approach to this project has a sophistication that tells a story about the process and the relationships that the Manufaktur will nurture. There is nothing overly literal about the design of the building – it is about mood and function rather than novelty and gimmicks. "We tried not to interpret the physical properties of crystals in our building geometry," explains Thorsen. "We have tried to understand what makes crystal so special and attractive and use these ephemeral qualities to create a specific atmosphere. It is a space that has an incredible amount of daylight penetration, something unseen in any other production facility. Crystals only come to life with light, so for us it is the intense presence of that daylight that is the most important aesthetic aspect of this building."

The sense of transparency and openness within the new Manufaktur building makes it as visceral and as thrilling as it is practical and conducive to creating crystal innovations. "Introducing a new typology of work, the Manufaktur is a new chapter for us and our clients, and we look forward to see how the new buildings change the way we innovate, work together and think. As Winston Churchill once said: 'We shape our buildings, and afterwards our buildings shape us."

Variations on Surface Effects

2x

Both sides of the stone are treated with an effect (e.g. art. 5328 AB 2x).

B

Effects on three sides of a cube shape (e.g. art. 5601 AB B).

V

The effect is used in reverse. A surface effect is used like a translucent effect (e.g. art. 2420 NoHF SSHA V – Silver Shade on the reverse side).

Z

Only a part of the stone is treated with an effect (e.g. art. 4869 HEL Z).

FC (Full Coated)
Improved technology allows for the perfectly homogeneous, all-round application of high-intensity metallic effects in the Bead assortment (art. 5000).

CAL´V´SI & CAL´VZ´SI
The effect CAL (Comet Argent Light) effect is also used as a mirror coating on the reverse side of the crystal instead of standard foilings (A, F, etc.) in special cases (e.g. art. 2035).

/G
Article with a partly (PF) or fully frosted (FF) surface (e.g. art. 2611/G).

Special Surface Effects
Swarovski has been able to achieve special surface effects by using special chemical and mechanical processes on the surface of the crystals.

Effect Code	*Name*
MAT	Matt Finish

The Matt Finish effect is achieved by performing a chemical matting process on the entire surface of the crystal. Small variations in the size of the articles may occur as a result of this chemical process.

FOILING

Foiling is the process of mirror coating the reverse side of the crystals.

Silver Foiling (A)
A silver mirror finish for XIRIUS and XILION Hotfix articles only.

Platinum* Pro Foiling (F)
A silver mirror finish that is coated with a platinum-colored protective layer of the highest quality. The Platinum Pro Foiling is not only resistant to environmental damage from chlorine, salt water, and perfume – it can also withstand processes such as soldering and electroplating, giving it unprecedented durability (e.g. art. 4120).

Aluminum Foiling (M)
An aluminum mirror finish is applied using a vacuum coating process (e.g. art. 2855 Flat Back HF).

Protective Layer (P) for Beads and Pendants
Protective layer is a transparent lacquer system that is applied over the effects. This lacquer is designed to protect the effects from scratches, fingerprints, and other damage, and also helps to prevent moisture that can lead to corrosion (e.g. perspiration) penetrating into the effect layer when jewelry is designed to incorporate Crystal Stones that are not set in casings/settings.

Unfoiled (U)

HOTFIX TECHNOLOGY

Hotfix (HF)
Hotfix technology involves applying specially developed glue onto the reverse side of Flat Backs. The glue is extremely flexible and is activated at a temperature of 120°C, with the option of being applied up to 170°C. It bonds with the carrier material and the crystal element becomes permanently fixed during cooling.

Hotfix Transparent (HFT)
This variant of the Hotfix technology is a patented bonding agent that is applied to the reverse side of non-mirror-finished Flat Backs, resulting in an interesting "raindrop" effect in which the crystal takes on the color of the carrier material.
This transparent bonding agent is also used with Crystal Lacquer[PRO] effects on Flat Backs.

No Hotfix (No HF)
Flat Back articles are also available as No Hotfix articles with no glue on the reverse side. For more information please contact your local Swarovski sales office.

* Silver mirror coated with a platinum-colored protective layer.

WARNING NOTICES

General Warning ⚠

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose or chip. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose, in particular to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Tableware

The application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users. The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible for complying with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products, and waives all its own claims against Swarovski.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm. Any verbal, written, or test-based advice that Swarovski provides regarding techniques for the application of its products is a recommendation based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user's responsibility.

Change of Product

Swarovski reserves the right to modify the dimensions, shape, composition and concentration of components belonging to products that are referred to in this Product Information brochure. Furthermore, any applicable laws and regulations mentioned are subject to change, which is why Swarovski regularly publishes an updated version of the Product Information brochure containing facts, (application) instructions, and the current legal situation that is valid at the time of publication. References to compliance with such regulations as are stated above are based on their requirements as of the current date. Anyone seeking an in-depth understanding of the provisions should read the various laws in their entirety and/or seek advice from a legal counsel.
The customer must request and observe the valid version of the Product Information brochure before (re)ordering and using the products.

B

Speziell bei Würfelformen, Bedampfung von drei Flächen (z. B. Art. 5601 AB B).

V

Der Effekt wird umgekehrt angebracht. Der Oberflächeneffekt wird wie ein Durchscheineffekt verwendet (z. B. Art. 2420 NoHF SSHA V – Silber Shade auf der Rückseite).

CAL´V´SI & CAL´VZ´SI
Bei besonderen Anforderungen wird der CAL (Comet Argent Light) Effekt anstatt der Standard-Similisierung (A, F...) als Silberspiegel auf der Rückseite des Kristalls verwendet (z. B. Art. 2035).

/G
Artikel mit einer teilmattierten (PF) oder voll-mattierten (FF) Oberfläche (z. B. Art. 2611/G).

Spezielle Oberflächeneffekte
Durch besondere chemische und mechanische Bearbeitung der Kristalloberfläche kann Swarovski spezielle Oberflächeneffekte erreichen.

Effektcode	*Name*
MAT	Matt Finish

Der Effekt Matt Finish entsteht durch chemische Mattierung der gesamten Kristalloberfläche. Durch die chemische Behandlung des Kristalls können kleinere Maßabweichungen nach der Mattierung nicht ausgeschlossen werden.

SIMILISIERUNG

Similisierung ist die brillanzverstärkende Verspiegelung der Rückseite von Schmucksteinen.

Silber-Foiling (A)
Ein Silberspiegel, nur für XILION und XIRIUS Hotfix Artikel.

Platinum* Pro Foiling (F)
Ein Silberspiegel, überzogen mit einer platinfarbenen Schutzschicht von höchster Qualität. Das äußerst strapazierfähige Platinum Pro Foiling ist resistent gegen Umwelteinflüsse wie Chlor, Salzwasser und Parfüm und hält auch Verarbeitungsverfahren wie Löt- und Galvanisierprozessen problemlos stand (z. B. Art. 4120).

Aluminium-Foiling (M)
Ein Aluminiumspiegel, vom technischen Standpunkt eine Bedampfung (z. B. Art. 2855 Flat Back HF).

Protective Layer (P) für Beads und Pendants
Bei Protective Layer handelt es sich um eine transparente Lackschicht, die auf Effekten aufgetragen wird. Diese Lackschicht wurde entwickelt, um die Effekte vor Kratzern, Fingerabdrücken und anderen Schäden zu schützen. Zudem beugt sie Feuchtigkeit (z. B. hervorgerufen durch Transpiration) vor, die zu Korrosion führen und in die Effektschicht eindringen kann, wenn Kristalle ohne Casings/Settings für Schmuckstücke verwendet werden.

Unsimilisiert (U)

HOTFIX TECHNOLOGIE

Hotfix (HF)
Bei der Hotfix-Technologie wird ein speziell entwickelter Klebstoff auf der Rückseite der Flat Backs angebracht. Der extrem flexible Kleber wird bei einer Temperatur von 120°C aktiviert und verbindet sich mit dem Trägermaterial. Durch seine hohe Flexibilität kann die Applikationstemperatur auf bis zu 170°C erhöht werden. Durch das Abkühlen werden die Kristallelemente dauerhaft auf dem Trägermaterial fixiert.

Hotfix Transparent (HFT)
Diese Hotfix-Variante mit einem patentierten, transparenten Haftvermittler, der auf der Rückseite unverspiegelter Flat Backs angebracht wird, bewirkt einen interessanten Regentropfen-Effekt, indem der Kristall die Farbe des Trägermaterials annimmt. Dieser transparente Haftentwickler wird auch bei den Crystal Lacquer[PRO] Effekten auf Flatbacks verwendet.

No Hotfix (No HF)
Hotfix-Produkte können wahlweise auch als No Hotfix Version ohne Kleber bestellt werden. Für nähere Informationen kontaktieren Sie bitte Ihre lokale Swarovski Vertriebsgesellschaft.

* Qualitativ hochwertiger Silberspiegel überzogen mit platinfarbener Schutzschicht.

Lose Kristalle können eine Kleinteilgefahr für kleine Kinder, insbesondere Kinder unter 3 Jahren, darstellen. Abhängig von der Größe der Kristalle und den beigefügten Materialien (wie z. B. Klebstoff, Textilien etc.) können Kinder daran ersticken, sie einatmen, verschlucken oder in die Nase einführen. Magnetprodukte mit Kristallapplikationen können bei Aufnahme in den Körper ein besonderes Risiko von ernsthaften Darmverletzungen darstellen. Die im Application Manual angeführten Applikationstechniken garantieren nicht, dass sich Kristalle nach der Applikation nicht ablösen. Der Hersteller muss für jede Applikation bestimmen, ob das Produkt die relevanten Bestimmungen hinsichtlich Kleinteilgefahren erfüllt, und muss jegliches Risiko, das es für Kinder darstellen kann, beurteilen. Das Nichtbeachten der von Swarovski erstellten Pflegehinweise kann zu Schäden an den Kristallen führen, von denen Verletzungsrisiken oder andere Schäden ausgehen können.

Warnung für Geschirr

Das Anbringen von losen Kristallen an Geschirr birgt das potentielle Risiko von Einatmen, Ersticken, Verschlucken oder Zahnschäden, sollten sich Kristalle lösen. Um dieses Risiko zu verringern, dürfen die Kristalle weder an Oberflächen angebracht werden, die üblicherweise mit Lebensmitteln oder Mund in Kontakt kommen, noch auf Geschirr, das für die Nutzung durch Kinder bestimmt ist. Mit Kristallen versehenes Geschirr, das ausschließlich für dekorative Zwecke vorgesehen ist, muss als solches entsprechend gekennzeichnet werden. Um Schäden durch den Geschirrspüler vermeiden, muss mit Kristallen verziertes Geschirr von Hand gewaschen werden. Die im Application Manual angeführten Applikationstechniken und Empfehlungen garantieren nicht, dass sich Kristalle nach der Applikation nicht ablösen. Der Hersteller muss für jede Applikation bestimmen, ob das Produkt die relevanten Bestimmungen hinsichtlich Kleinteilgefahren oder hinsichtlich dem Gebrauch von Materialien, welche üblicherweise mit Lebensmitteln in Kontakt kommen, erfüllt, und muss jegliches Risiko, das es für den Nutzer darstellen kann, beurteilen. Die Verwendung von Kristallen (welche Substanzen enthalten können, die in den jeweiligen nationalen Gesetzen als gefährlich bekannt sind) sowie Klebstoffen auf Geschirr, unterliegt in bestimmten Ländern gesetzlichen Einschränkungen. Für die Einhaltung dieser länderspezifischen Vorschriften ist der Kunde verantwortlich und stellt Swarovski für alle im Bereich der Produkthaftung oder anderen Nutzung von Swarovski Produkten in diesem Zusammenhang geltend gemachten Ansprüche von Dritten vollkommen frei und verzichtet auf die Geltendmachung eigener Ansprüche.

Ungeeignete Applikationen

Kristall von Swarovski wird typischerweise im Bereich der Mode, Schmuck, Accessoires, auf textilen Produkten und im Bereich Interieur verarbeitet. Aufgrund seiner physikalischen Eigenschaften ist Kristall von Swarovski für sonstige Applikationen ungeeignet (z. B. Aufkleben auf Zähnen, die Verwendung von Kristallen auf und in der Nähe von Schleimhäuten und andere untypische Anwendungen). Für alle im Bereich der Produkthaftung oder anderen Nutzung von Swarovski Produkten in diesem Zusammenhang geltend gemachten Ansprüche von Dritten stellt der Kunde Swarovski vollkommen frei und verzichtet auf die Geltendmachung eigener Ansprüche.

Verantwortung des Anwenders

Das Nichtbeachten der von Swarovski erstellten Pflegehinweise kann zu Schäden an den Kristallen führen, von denen Verletzungsrisiken oder andere Schäden ausgehen können. Unsere anwendungstechnische Beratung in Wort, Bild und durch Versuche erfolgt als Empfehlung nach dem heutigen Stand unserer Kenntnisse und den Angaben unserer Lieferanten. Sie kann jedoch die eigene Prüfung des Kunden der von uns vorgeschlagenen Verfahren auf deren Eignung für die beabsichtigte Anwendung nicht ersetzen. Variantes des effets de surface

2x

Les deux faces de la pierre sont traitées avec un effet (par ex. art. 5328 AB 2x).

B

Effets sur trois côtés d'une forme cubique (par ex. art. 5601 AB B).

V

L'effet est appliqué sur l'envers. L'effet de surface est visible par transparence (par ex. art. 2420 NoHF SSHA V - Silver Shade sur l'envers).

Z

Seule une partie de la pierre est traitée avec un effet (par ex. art. 4869 HEL Z).

FC (Full Coating - Revêtement intégral)
Cette technique avancée permet une application intégrale et parfaitement homogène d'effets métallisés de haute intensité dans la gamme des Beads (art. 5000).

CAL´V´SI & CAL´VZ´SI
L'effet CAL (Comet Argent Light) est aussi utilisé comme revêtement miroir au dos du composant en cristal en remplacement des similisations standard (A, F, ...) pour des produits spécifiques (par ex. art. 2035).

/G
Produit dont la surface est partiellement (PF) ou entièrement (full) dépolie (FF) (par ex. art. 2611/G).

Effets de surface spéciaux
Swarovski est capable de produire différents effets de surface grâce à des procédés chimiques et mécaniques spécifiques appliqués sur la surface des cristaux.

Code d'effet	*Nom*
MAT	Matt Finish

L'effet Matt Finish résulte d'un traitement chimique matifiant appliqué sur toute la surface du cristal, qui peut entraîner de légères variations dans la dimension des articles.

SIMILISATION

La similisation est un procédé de revêtement miroir appliqué au dos des composants.

Similisation Argent (A)
Revêtement miroir en Argent existant uniquement pour les articles de la gamme XIRIUS et XILION Hotfix.

Similisation Pro Platinium* (F)
Revêtement miroir argenté recouvert d'une couche protectrice haut de gamme de couleur platine. La similisation Pro Platinium* résiste aux agressions environnementales dues au chlore, à l'eau salée ou au parfum, et peut également supporter des procédés tels que la soudure et la galvanisation, et offrir ainsi une durabilité exceptionnelle (par ex. art. 4120).

Similisation Aluminium (M)
Revêtement miroir aluminium appliqué par vaporisation (par ex. art. 2855 Flat Back HF).

Vernis protecteur (P) pour les Beads et Pendants
Le vernis protecteur est une couche de laque transparente appliquée sur les effets. Ce vernis protège les effets des rayures, traces de doigt et autres agressions. Il protège également la qualité des effets des composants en cristal non sertis utilisés dans la bijouterie qui pourraient être exposés à l'humidité et à la corrosion (ex. la transpiration).

Non similisée (U)

TECHNOLOGIE HOTFIX

Hotfix (HF)
La technologie Hotfix désigne le thermocollage d'un composant à fond plat Flat Back dont l'envers est revêtu d'un adhésif, spécifique. Cet adhésif spécialement développé et extrêmement flexible, entre en action à une température de 120°C, avec une souplesse d'application pouvant aller jusqu'à 170°C, et adhère au support de base. Le composant en cristal est définitivement fixé au support lors du refroidissement de l'adhésif.

Hotfix Transparent (HFT)
Cette variante de la technologie Hotfix désigne le thermocollage d'un composant en cristal à fond plat Flat Back non similisé dont l'envers est revêtu d'un adhésif breveté. Ce procédé assure un effet «goutte d'eau» intéressant et permet au cristal d'emprunter la couleur du support de base.
Cet adhésif transparent est également utilisé avec les effets Crystal Lacquer[PRO] des composants Flatbacks.

No Hotfix (No HF)
Les produits Hotfix sont également disponibles en version Non Hotfix, c'est-à-dire sans adhésif appliqué sur l'envers du composant. Pour plus d'informations, veuillez contacter votre bureau de vente Swarovski.

* Revêtement miroir argenté recouvert d'une couche protectrice platine.

Les cristaux mobiles ou qui se détachent peuvent représenter un risque pour les jeunes enfants et plus particulièrement pour ceux de moins de trois ans. Les composants en cristal de petites dimensions ainsi que les matériaux associés (colle, tissu, etc.) sont à maintenir hors de portée des enfants afin d'éviter tout risque d'ingestion ou d'inhalation accidentelle entraînant l'étouffement. L'ingestion de produits magnétiques décorés avec du cristal peut engendrer un risque sérieux de lésions intestinales. Les techniques d'applications détaillées dans le manuel d'application ne garantissent pas qu'aucun cristal ne se détachera. Pour chaque application, le fabricant devra déterminer si son produit fini respecte les réglementations existantes en matière de petites pièces, et évaluera le danger que celui-ci pourrait représenter pour de jeunes enfants. Le non respect des consignes d'entretien recommandées par Swarovski risque d'endommager les composants en cristal qui pourraient par conséquent provoquer des lacérations ou d'autres dégâts.

Avertissement concernant la vaisselle usuelle

L'application sur de la vaisselle usuelle de cristaux mobiles ou qui peuvent éventuellement se détacher présente un risque potentiel d'inhalation ou d'ingestion accidentelle pouvant entraîner l'étouffement ou des dégâts dentaires éventuels. Afin de limiter ces risques, les cristaux ne doivent jamais être appliqués sur de la vaisselle usuelle susceptible d'entrer en contact avec des aliments ou la bouche, ni sur de la vaisselle usuelle destinée aux enfants. La vaisselle ornée de cristaux à usage exclusivement décoratif doit être spécifiée comme étant décorative uniquement. Il est conseillé de laver à la main la vaisselle décorative ornée de cristaux afin d'éviter d'endommager les cristaux au lave-vaisselle. Les techniques ou recommandations d'application détaillées dans le manuel d'application ne garantissent pas qu'aucun cristal ne se détachera. Pour chaque application, le fabricant devra déterminer si son produit fini respecte les réglementations existantes en matière de petites pièces et de produits en contact avec les aliments, et évaluera le danger que celui-ci peut représenter pour les usagers.

L'utilisation de cristaux (susceptibles de contenir des substances considérées comme dangereuses selon la législation locale propre à certains pays) et d'adhésifs sur de la vaisselle usuelle est soumise à des restrictions légales propres à certains pays. Le client assume l'entière responsabilité de conformité avec les dispositions spécifiques à chaque pays, et défend, indemnise et garantit Swarovski contre les recours de tout tiers reposant sur la responsabilité des produits ou l'utilisation, de toute autre manière, des produits Swarovski, et renonce à ses propres réclamations contre Swarovski.

Variazioni sugli effetti speciali in superficie

2x

L'effetto viene applicato su entrambe le facce della pietra (per esempio art. 5328 AB 2x).

B

L'effetto viene applicato sui tre lati di un cubo (per esempio art. 5601 AB B).

V

L'effetto viene applicato sul rovescio. Viene utilizzato un effetto in superficie come un effetto in trasparenza (es. art. 2420 NoHF SSHA V - Silver Shade sul rovescio)..

Z

L'effetto viene applicato solo su una parte della pietra (es. art. 4869 HEL Z).

FC (Full Coated)
Tecnologia ottimizzata che crea un'applicazione perfettamente omogenea e a tutto tondo di effetti metallici ad alta intensità nell'assortimento Bead (art. 5000).

CAL´V´SI e CAL´VZ´SI
L'effetto CAL (Comet Argent Light) viene altresì utilizzato come rivestimento specchiato sul lato posteriore del cristallo al posto del foiling standard (A, F, ...) in casi speciali (ad es. art. 2035).

/G
Articolo con superficie parzialmente (PF) o totalmente satinata (FF) (ad es. art. 2611/G).

Effetti speciali in superficie
Trattando la superficie dei cristalli con speciali processi chimici e meccanici, Swarovski è riuscita ad ottenere diversi effetti speciali in superficie.

Codice effetto	*Nome*
MAT	Matt Finish

L'effetto Matt Finish si ottiene mediante un processo chimico di opacizzazione dell'intera superficie del cristallo. Questo processo può produrre piccole variazioni nelle dimensioni degli articoli.

TALCATURA O FOILING

Il termine foiling indica il rivestimento a specchio applicato sul retro dei cristalli.

Silver Foiling (A)
Finitura a specchio in argento solo per articoli XIRIUS e XILION Hotfix.

Foiling Platinum* Pro (F)
Il foiling Platinum* Pro oltre a resistere a danni ambientali dovuti ad esposizione a cloro, acqua salata e profumo, è in grado di resistere a vari processi come ad esempio saldatura ed elettrodeposizione, per offrire una durata senza precedenti (ad esempio art. 4120).

Aluminum Foiling (M)
Finitura a specchio in alluminio applicata mediante un processo di vaporizzazione (ad es. art. 2855 Flat Back HF).

Protective Layer (P) per bead e pendenti
Il Protective Layer è un rivestimento in smalto trasparente applicato sopra gli effetti. Questo smalto è studiato in modo tale da proteggere la superficie da graffi, impronte di dita e altri danni. Inoltre impedisce che l'umidità penetri attraverso lo strato degli effetti provocandone la corrosione (ad es. tramite perspirazione) nel caso di gioielli decorati con cristalli privi di apposita sede/montatura.

Senza Foiling (U)

TECNOLOGIA HOTFIX

Hotfix (HF)
La tecnologia Hotfix prevede l'applicazione di una colla speciale sul retro dei cristalli Flat Back. Questa colla estremamente flessibile si attiva a una temperatura di 120°C e raggiunge la giusta flessibilità applicativa a 170°C legandosi al materiale di supporto. Una volta raffreddata, la colla fissa i componenti di cristallo in modo permanente.

Hotfix Transparent (HFT)
Questa variante della tecnologia Hotfix consiste nell'applicazione di un agente legante brevettato sul retro delle pietre Flat Back senza talcatura. Il risultato è un interessante "effetto goccia" che consente al cristallo di assumere il colore dei materiali di supporto. L'agente legante trasparente viene anche utilizzato con effetti Crystal Lacquer^{PRO} su Flat Back.

No Hotfix (No HF)
Tutti gli articoli Hotfix sono disponibili anche nella versione No Hotfix, ovvero senza colla sul retro. Per ulteriori informazioni, vi invitiamo a contattare l'ufficio vendite Swarovski della vostra zona.

* Specchio in argento rivestito con uno strato protettivo color platino.

AVVISI

Avvertenza generale ⚠

Date le loro dimensioni, i cristalli sfusi possono rappresentare un pericolo per i bambini, in particolare se di età inferiore a tre anni. A seconda delle dimensioni dei cristalli e dei impiegati per la loro applicazione (ad es. colla, tessuto ecc.), i bambini potrebbero essere esposti al rischio di soffocamento, potrebbero inalare e ingerire i cristalli o introdurli nelle cavità nasali. I prodotti magnetici con applicazioni in cristallo potrebbero provocare gravi problemi intestinali in caso d'ingestione. Le tecniche di applicazione riportate nel Manuale di Applicazione non garantiscono contro il possibile distacco dei cristalli. Per ogni applicazione, il produttore è tenuto a verificare che il prodotto soddisfi le norme vigenti in materia di rischi associati alle componenti di piccole dimensioni e di valutare qualunque altro rischio per i bambini. La mancata osservanza delle istruzioni per la cura dei prodotti fornite da Swarovski può comportare il danneggiamento dei cristalli con conseguente rischio di lacerazioni cutanee o altri infortuni.

Avvertenza per gli articoli da tavola

L'applicazione di cristalli sfusi su articoli per la tavola presenta rischi potenziali di aspirazione, soffocamento, ingestione e danneggiamento dei denti in caso di distacco dei cristalli. Per ridurre questo rischio, si raccomanda di non applicare mai i cristalli sulle superfici di articoli che possono entrare a contatto con gli alimenti e la bocca o su articoli destinati ai bambini. Gli articoli da tavola con cristalli applicati puramente a scopo decorativo devono essere identificati come tali. Per preservare l'integrità degli articoli da tavola decorati con i cristalli, si raccomanda di lavarli a mano piuttosto che nel lavastoviglie. Le tecniche o i consigli per l'applicazione contenuti nel presente manuale non garantiscono contro il possibile distacco dei cristalli. Per ciascuna applicazione, il produttore è tenuto a valutare se il prodotto soddisfa i requisiti normativi vigenti in materia di rischi associati ai componenti di piccole dimensioni o all'impiego su prodotti a contatto con gli alimenti e di valutare ogni possibile rischio per l'utilizzatore. L'applicazione di cristalli (che possono contenere sostanze regolamentate e ritenute pericolose ai sensi delle leggi locali) e di adesivi sugli articoli da tavola è soggetta a restrizioni legali in alcuni Paesi. Al cliente spetta la responsabilità esclusiva di garantire l'ottemperanza alle norme locali, mallevando e tenendo indenne Swarovski rispetto a qualunque azione legale di terzi sulla responsabilità del prodotto o altresì correlata all'uso dei prodotti Swarovski. Il cliente rinuncia inoltre a qualunque diritto di intraprendere azioni legali contro Swarovski.

Applicazioni non idonee

I cristalli Swarovski possono essere utilizzati per la realizzazione di articoli di moda, gioielli e accessori, per prodotti tessili e oggetti per l'arredamento di interni. In ragione delle loro caratteristiche fisiche, i cristalli Swarovski non sono idonei per usi diversi (ad esempio, l'applicazione su denti o l'uso di cristalli in prossimità o a diretto contatto con mucose né per altri impieghi dannosi). Il cliente malleva e tiene indenne Swarovski rispetto a qualsiasi richiesta di terzi in merito alla responsabilità di prodotto o altresì correlata all'uso dei prodotti Swarovski, rinunciando ad intraprendere qualunque azione legale contro Swarovski.

Responsabilità dell utente

La mancata applicazione delle istruzioni per la cura dei prodotti fornite da Swarovski potrebbe produrre danni al cristallo e conseguentemente danneggiare gli articoli in tessuto o causare danni di altro tipo. Qualunque consiglio fornito da Swarovski in forma scritta, orale o come risultato di prove condotte in relazione alle tecniche di applicazione dei suoi prodotti, costituisce una raccomandazione basata sulle attuali conoscenze di Swarovski e sulle informazioni ricevute dai suoi fornitori. Detto consiglio non esonera il cliente dal condurre test indipendenti in relazione alle tecniche che intende utilizzare e alla loro idoneità per l'applicazione prevista. L'applicazione, l'uso e l'elaborazione di dette tecniche e prodotti rientrano esclusivamente nelle responsabilità dell'utente.

B

Efectos en tres lados de una forma cúbica (por ej. art. 5601AB B).

V

El efecto se usa al contrario. Un efecto aplicado en la superficie es utilizado como un efecto traslúcido (por ej. art. 2420 NoHF SSHA V – Silver Shade en el reverso).

Z

El efecto solo se aplica en una parte del cristal (por ej. art. 4869 HEL Z).

FC (Full Coated, revestimiento completo)
Las mejoras tecnológicas crean aplicaciones perfectamente homogéneas y aplicaciones integrales de efectos metálicos de alta intensidad en la gama Bead (art. 5000).

CAL´V´SI & CAL´VZ´SI
El efecto CAL (Comet Argent Light) se utiliza también como recubrimiento reflectante en el reverso del cristal en lugar de los talcos estándar (A, F, ...) en casos especiales (por ejemplo art. 2035).

/G
Artículo con superficie parcial (PF) o completamente esmerilada (FF) (por ejemplo art. 2611/G).

Efectos especiales en la superficie
Swarovski ha podido lograr diversos efectos especiales utilizando procesos químicos y mecánicos en la superficie de los cristales.

Código del efecto	*Nombre*
MAT	Matt Finish

El efecto Matt Finish se logra realizando un proceso químico de mateado en toda la superficie del cristal. Este proceso puede producir ligeras variaciones en el tamaño de los artículos.

SIMILIZACIÓN

El proceso de similización consiste en recubrir la parte posterior del cristal con una lámina metalizada para obtener un efecto espejo.

Talco en plata (A)
Un efecto espejo plateado para artículos XIRIUS y XILION Hotfix exclusivamente.

Talco en platino* pro (F)
El talco en platino* pro no solo es resistente a los daños ambientales del cloro, el agua salada y el perfume, sino que también puede soportar procesos tales como la soldadura y el galvanizado, lo que le confiere una durabilidad sin precedentes (p.ej., art. 4120).

Talco aluminio (M)
El efecto espejo es aluminio y se aplica utilizando un proceso de vaporización (por ejemplo art. 2855 Flat Back HF).

Capa protectora (P) para Beads y Pendants
La capa protectora es un sistema de lacado transparente que se aplica en todos los efectos. La laca se ha diseñado para proteger los efectos frente a arañazos, huellas y otros daños. Además, evita la humedad que puede causar corrosión (por ejemplo, de la transpiración) penetrando en la capa del efecto mientras se diseña el artículo para incorporar Crystal Stones que no están engarzadas en bases o engastes.

Sin talco (U)

TECNOLOGÍA HOTFIX

Hotfix (HF)
La tecnología Hotfix consiste en aplicar un adhesivo desarrollado especialmente para el reverso de los Flat Backs. El adhesivo, que es sumamente flexible, se activa a temperaturas de 120 °C, con la posibilidad de aplicarse a hasta 170 °C, y se adhiere al material de base. El elemento de cristal se fija de manera permanente al material de base durante el proceso de enfriamiento.

Hotfix Transparente (HFT)
Esta variante de la tecnología Hotfix es un adhesivo patentado que se aplica en la parte posterior de los cristales Flat Backs sin talco dando como resultado un efecto de "gotas de lluvia" por el que el cristal toma el color del material en el que queda aplicado. Este agente de unión transparente también se utiliza con efectos Crystal Lacquer^{PRO} en los Flatbacks.

No Hotfix (No HF)
Los artículos Hotfix también están disponibles como No Hotfix, es decir, sin adhesivo en la parte posterior. Para más información, póngase en contacto con el servicio de Atención al cliente.

* Espejo plateado revestido con una capa protectora de color platino.

AVISOS DE ADVERTENCIA

Advertencia General ⚠

Los cristales sueltos, debido a su reducido tamaño, pueden suponer un riesgo para los niños menores de tres años. Dependiendo del tamaño del cristal y del material de fijación (como pegamento, tejido, etc.), los niños pueden atragantarse, ingerir los cristales o introducírselos en la nariz. Los productos magnéticos con aplicaciones de cristal suponen un riesgo especial de lesión intestinal en caso de ingestión. Las técnicas de aplicación detalladas en este catálogo no garantizan que los cristales no se desprendan. Para cada aplicación, el fabricante debe determinar si el producto cumple con los requisitos pertinentes referentes al peligro que supone utilizar piezas pequeñas y valorar cualquier riesgo que puedan suponer para los niños pequeños. Si no se siguen las instrucciones de cuidado de Swarovski el cristal podría resultar dañado, lo cual puede constituir un riesgo de laceración u otros daños.

Advertencia sobre los servicios de mesa

La aplicación de cristales sueltos a servicios de mesa presenta un riesgo potencial de que sean inhalados, ingeridos o que causen atragantamientos o daños en los dientes si los cristales se desprenden. Para reducir este riesgo, nunca deben aplicarse cristales a ningún artículo de servicio de mesa que pueda entrar en contacto con los alimentos o la boca, y nunca deben aplicarse cristales en ningún artículo de servicio de mesa destinado a ser utilizados por niños. Los artículos de servicio de mesa con cristales que estén destinados únicamente a usos decorativos, deben estar indicados como tales. Para evitar daños en el lavavajillas, estos artículos decorados con cristales deben lavarse a mano. Las técnicas de aplicación o sugerencias de este manual no garantizan que los cristales no se desprendan. Para cada aplicación, el fabricante debe determinar si el producto cumple con los requisitos pertinentes referentes a los riesgos presentados por utilizar piezas pequeñas o el uso en artículos que estén en contacto con los alimentos y evaluar cualquier riesgo que pueda constituir para los usuarios.

El uso de cristales (que puedan contener sustancias restringidas consideradas peligrosas bajo leyes locales) y adhesivos en artículos de servicio de mesa está sujeto a restricciones legales en países específicos. El cliente es totalmente responsable del cumplimiento de estas disposiciones específicas de cada país y defenderá, indemnizará y protegerá a Swarovski contra toda demanda por parte de terceros basada en responsabilidad respecto al uso del producto de otro tipo en relación con los usos de productos Swarovski y renuncia a todas sus propias demandas contra Swarovski.

Aplicaciones no recomendadas

Los cristales Swarovski están pensados para las industrias de la moda, bisutería, accesorios, productos textiles y decoración de interiores. Por sus características físicas, los cristales Swarovski no están recomendados para otros usos (por ej., fijación en la dentadura, aplicación en o cerca de las membranas mucosas y otros usos que puedan considerarse peligrosos). El cliente deberá defender, indemnizar y mantener a Swarovski al margen de cualquier reclamación basada en la responsabilidad respecto al uso de los productos Swarovski que hayan sido comprados por el cliente y renunciar a sus propias reclamaciones.

Responsabilidad del cliente

Si no se siguen las instrucciones de cuidado de Swarovski el cristal podría resultar dañado, lo cual puede constituir un riesgo de laceración u otros daños. El asesoramiento proporcionado de forma verbal, por escrito o basado en pruebas que Swarovski proporciona en las diferentes técnicas de aplicación de sus productos son recomendaciones basadas en nuestros conocimientos actuales y la información facilitada por nuestros proveedores. No obstante, estas recomendaciones no le eximen de realizar sus propias pruebas con respecto a las técnicas propuestas y de comprobar su idoneidad para la aplicación deseada. La aplicación, el uso y el procesamiento de estas técnicas y productos son responsabilidad exclusiva del cliente.

Variações nos efeitos de superfície

2x

Ambos os lados da pedra são tratados com um efeito (por ex., artigo 5328 AB 2x).

B

Efeitos nos três lados de uma forma cúbica (por ex., artigo 5601 AB B).

V

O efeito de superfície é utilizado no verso do cristal. Um efeito de superfície é utilizado como um efeito translúcido (por ex., artigo 2420 NoHF SSHA V – Silver Shade no verso do cristal).

Z

Apenas uma parte da pedra é tratada com um efeito (por ex., artigo 4869 HEL Z).

FC (Revestimento total)
A tecnologia avançada cria uma aplicação de efeitos metálicos de alta intensidade perfeitamente homogênea em toda a volta na linha Beads (artigo 5000).

CAL 'V' SI e CAL 'VZ'SI
Em casos especiais, o efeito CAL (Comet Argent Light) também será utilizado como um revestimento espelhado no verso do cristal, em vez de metalizações padrão (A, F, ...) (por ex., artigo 2035).

/G
Artigo com superfície parcialmente (PF) ou totalmente (FF) fosca (por ex., artigo 2611/G).

Efeitos especiais de superfície
A Swarovski revelou ser capaz de apresentar vários efeitos especiais de superfície ao longo do tempo, utilizando processos químicos e mecânicos na superfície dos cristais.

Código do efeito	*Nome*
MAT	Matt Finish

O efeito Matt Finish é alcançado através de um processo químico com acabamento mate em toda a superfície do cristal. Podem ocorrer pequenas variações no tamanho dos artigos como resultado desse processo químico.

REVESTIMENTO DE ESPELHO

Trata-se do processo de aplicação do espelho que reveste o verso dos cristais.

Revestimento de prata (A)
Um acabamento de espelho prateado apenas para artigos Hotfix XIRIUS e XILION.

Revestimento Platinum* Pro (F)
Um acabamento de espelho prateado revestido e protegido com uma camada platinada da mais alta qualidade.
O revestimento Platinum* Pro não é apenas resistente ao dano ambiental causado pelo cloro, água salgada e perfume – ela pode resistir também aos processos como solda e folheação, proporcionando uma durabilidade sem precedentes (por ex., artigo 4120).

Revestimento de alumínio (M)
É aplicado um acabamento de espelho em alumínio, recorrendo a um processo de revestimento a vácuo (por ex., artigo 2855 Flat Back HF).

Camada Protetora (P) para contas e pendentes
A camada protetora consiste em um sistema que utiliza verniz transparente aplicado sobre os efeitos. Este verniz destina-se a proteger os efeitos de arranhões, impressões digitais e outros danos, bem como a evitar que a umidade (como, por exemplo, da transpiração) possa levar à corrosão da camada de efeito quando a bijuteria visa incorporar cristais que não sejam fixados em cavidades ou cravações.

Sem revestimento de espelho (U)

TECNOLOGIA HOTFIX

Hotfix (HF)
A tecnologia Hotfix envolve a aplicação de cola especialmente desenvolvida no verso dos Flat Backs. A cola, extremamente flexível, é ativada a uma temperatura de 120 °C, fixando-se ao material. A peça de cristal fica permanentemente colada ao material durante o processo de esfriamento.

Hotfix Transparente (HFT)
Esta variante da tecnologia Hotfix é um agente patenteado de fixação aplicado no verso dos Flat Backs sem acabamento de espelho, resultando em um interessante efeito de "gota de chuva", no qual o cristal adquire a cor da superfície em que foi aplicado. Este agente de fixação transparente também é usado com os efeitos Crystal Lacquer^{PRO} nos Flat Backs.

No Hotfix (No HF)
Os artigos Hotfix estão disponíveis também como artigos No Hotfix, que não têm cola aplicada no verso do cristal. Para obter mais informações, entre em contato com o escritório local da Swarovski.

表層效果的變化

2x

對水晶元素的兩面進行效果（例如產品 5328 AB 2x）。

B

在立方體的三面進行效果（例如產品 5601 AB B）。

V

把表層效果與半透明效果相反使用。表層效果的真空塗層用於底部，或半透明效果的真空塗層用於表面(例如，在水晶底部採用銀色魅影，產品 2420 平底石 SSHA V)。

Z

只對水晶元素的某一部分進行處理，而獲得的效果(例如產品 4869 HEL Z)。

FC (全塗層)
經過改良的技術可為珠子系列（產品 5000）營造均勻分佈、完美覆蓋的高密度金屬效果。

CAL 'V' SI & CAL 'VZ' SI
對於特定產品（例如产品 2035），CAL（銀光）效果亦會取代標準鍍底（A、F 等），被用作水晶元素底部的鏡面塗層。

/G
產品表面進行局部磨砂（PF）或全磨砂（FF）處理（例如產品 2611/G）。

特殊表層效果
施華洛世奇在水晶元素表層使用特殊化學與機械工序，造就各種不同的特殊表層效果。

效果編號	*名稱*
MAT	磨面加工

磨面加工效果是在水晶元素的整個表層進行化學磨面工序所獲得的效果。此化學工序可能會對水晶元素的尺寸造成細微的差異。

鍍底

鍍底是在水晶元素的底部進行鏡面塗層的工序。

銀色鍍底（A）
只適用於施悅™和施亮™熱熔膠產品的銀色鏡面。

Platinum* Pro 專業鍍底（F）
以優質的白金色保護層以達至銀色鏡面。Platinum* Pro 專業鍍底不但可抵禦來自氯氣、鹽水和香水的環境損害，亦能承受焊接和電鍍等工序，使其具備無與倫比的耐用性（例如产品 4120）。

鋁質鍍底（M）
使用真空塗層工序塗上的鋁質鏡面（例如产品 2855 烫石）。

珠子和鏈墜專用的保護層（P）
保護層是一種塗於效果表面的透明亮漆，用以保護效果免受刮花、指紋和其他損害。當水晶並非以底托或鑲嵌件鑲嵌在首飾上時，這保護層亦有助防止濕氣（如汗水）侵蝕效果塗層。

無鍍底（U）

熱熔膠技術

熱熔膠（HF）
熱熔膠技術包括把特別研發的熱熔膠膠水使用在平底石的底部。此膠水非常有彈性，可在攝氏 120 度下發生作用，並具有在 170 度下發生作用的彈性，亦能與承托物料結合。冷卻過程中，水晶元素會永久固定於承托物料上。

透明熱熔膠（HFT）
此為熱熔膠技術的變體，是一種專利的接合劑，可使用於非鏡面塗佈的平底石底部，並能使水晶呈現承托物料之顏色，然後產生饒富趣味的「雨點」效果。
此透明接合劑亦可配合 Lacquer^{PRO} 專業亮漆效果應用於平底石上。

無熱熔膠（No HF）
採用熱熔膠的產品，亦提供無熱熔膠處理的選擇，即不在底部使用熱熔膠水。詳情請與所在地區的施華洛世奇銷售辦事處聯絡。

* 以白金色保護層以達至銀色鏡面。

訂製方案

除一般產品系列外，施華洛世奇還提供各種訂製方案 *。

可選用的訂製方案如下 :

— **帶圖案 / 印花的標準產品**
— **為 CE 和 FIE 而設的訂製產品開發（可選取不同的切割 / 尺寸)**
— **按客戶要求的顏色 / 效果 / 印花對目錄中的產品進行特別加工**

鑒於各項技術的因素限制，訂製方案或許要求最少訂購量，而常規產品則以獨立包裝形式出售。訂製方案的訂購量可能會出現多供或少供 10% 的情況。如果某種產品的訂單價值低於非標準顏色和效果的標準產品的特定最少量（詳情請參考施華洛世奇價目表），施華洛世奇將加收 20% 的額外費用。請注意，特別製作產品的送貨時間將有別於一般產品。

欲知訂製方案的詳情及建議，請與所在地區的施華洛世奇銷售辦事處聯絡。

表层效果的变化

2x

对水晶元素的两面进行效果（如 5328 AB 2x）。

B

在立方体的三面进行效果（如 5601 AB B）。

V

把表层效果与半透明效果相反使用。表层效果的真空涂层用于底部，或半透明效果的真空涂层用于表面(如型号 2420 烫石 SSHAV - 银色魅影于水晶的背面)。

Z

只对水晶元素的某一部分进行处理，而获得的效果(如 4869 HEL Z)。

FC (完整涂层)
经过改良的技术可为珠子系列（型号 5000）营造均匀分布、完美覆盖的高密度金属效果。

CAL´V´SI 及 CAL´VZ´SI
对于特定产品（如圆形把手石、把手石及其他），CAL（银光）效果亦会取代标准镀底（A、F 等），被用作水晶元素底部的镜面涂层（如型号 2035）。

/G
产品表面进行局部磨砂（PF）或全磨砂（FF）处理（如型号 2611/G）。

特殊表层效果
施华洛世奇在水晶表层使用特殊化学与机械工序，造就了各种不同的特殊表层效果。

效果代码 *名称*
MAT 磨面加工

磨面加工效果是在水晶元素的整个表层进行化学磨面工序所获得的效果。此化学工序可能会对水晶元素的尺寸造成细微的差异。

镀底

镀底是在水晶元素的底部进行镜面涂层的工序。

银色镀底（A）
仅适用于施悦™和施亮™热熔胶产品的银色镜面。

Platinum* Pro 专业镀底（F）
Platinum* Pro 专业镀底不但可抵御来自氯气、盐水和香水的环境损害，亦能承受焊接和电镀等工序，使其具备出色的耐用性（如型号 4120）。

铝质镀底（M）
使用真空涂层工序涂上的铝质镜面
（如型号 2855 烫石）。

珠子和吊坠专用的保护层（P）
保护层是一种涂于效果表面的透明亮漆，用以保护效果免受刮花、指纹和其他损害。当水晶元素并非以底托或镶嵌件镶嵌在首饰时，这保护层亦有助防止湿气（如汗水）侵蚀效果涂层。

无镀底（U）

热熔胶技术

热熔胶（HF）
热熔胶技术包括把特别研发的热熔胶使用在平底石的底部。此胶水非常有弹性，可在摄氏 120 度下发生作用，并具有在 170 度下发生作用的弹性，亦能与承托物料结合。冷却过程中，水晶元素会永久固定于承托物料上。

透明热熔胶（HFT）
此为热熔胶技术的变体，是一种专利的接合剂，可使用于非镜面涂布的平底石底部，并能使水晶元素呈现承托物料之颜色，然后产生饶富趣味的「雨点」效果。
此透明接合剂亦可配合 Crystal Lacquer^{PRO} 专业亮漆效果应用于平底石上。

无热熔胶（No HF）
采用热熔胶的产品，亦提供无热熔胶处理的选择，即不在底部使用热熔胶水。详情请与所在地区的施华洛世奇销售办事处联系。

* 以白金色保护层以达至银色镜面。

订制方案

除一般产品系列外，施华洛世奇还提供各种订制方案 *。

可选用的订制方案如下：

- **采用非标准颜色和效果的标准产品**
- **带图案 / 印花的标准产品**
- **为 CE 和 FIE 而设的订制产品开发（可选取不同的切割 / 尺寸）**
- **按客户要求的颜色 / 效果 / 印花对目录中的产品进行特别加工**

鉴于各项技术的因素限制，订制方案或许要求最少订购量，而常规产品则以独立包装形式出售。订制方案的订购量可能会出现多供或少供 10% 的情况。如果某种产品的订单价值低于非标准颜色和效果的标准产品的特定最少量（详情请参考施华洛世奇价目表），施华洛世奇将加收 20% 的额外费用。请注意，特别制作产品的送货时间将有别于一般产品。

欲知订制方案的详情及建议，请与所在地区的施华洛世奇销售办事处联系。

* 适用于所有顾客。基于技术的可行性和适用的条款及条件，订制方案的订购量可能有限制。

表面エフェクトのバリエーション

2x

(例: art. 5328 AB 2x)。

B
キューブカットの 3 面のみにエフェクト処理
(例: art. 5601 AB B)。

V
通常コーティングする面の反対側に施すエフェクトです。表面エフェクトを裏面エフェクトのように加工します
(例: art. 2420 NoHF SSHA V - Silver Shade を裏面に加工)。

Z
ストーンの一部のみエフェクト処理
(例: art. 4869HEL Z)。

FC（フル・コーティング）
技術の向上によって、ビーズ･アソートメント（art. 5000）に高輝度メタリック・エフェクトの完全に均質な全面コーティングが実現しました。

CAL ‘V’ SI & CAL ‘VZ’ SI
特殊なケースでは、標準的なフォイル（A、F 等）のかわりに、クリスタル裏面に CAL（Comet Argent Light）エフェクトをミラー・コーティングとして使用することも可能です（例：art. 2035）

/G
部分フロスト加工（PF）または全面フロスト加工（FF）を施した製品（例：art. 2611/G）

特殊表面エフェクト
Swarovski は、クリスタルの表面に特殊な化学的および機械的加工を施すことにより、各種の特殊表面エフェクトを可能にしました。

エフェクトコード	*エフェクト名*
MAT	Matt Finish

Matt Finish エフェクトは、クリスタルの全表面に化学的につや消し処理を行うものです。この化学的処理のために、クリスタルのサイズに少々の差が生じることがあります。

FOILING（フォイル）

フォイルは、クリスタルの裏側にミラーコーティングする加工です。

シルバーフォイル（A）
XIRIUS及び XILION Hotfix 製品にのみ使われるシルバーミラー仕上げです。

プラチナ・プロ・フォイル（F）*
最高品質のプラチナカラーの保護層でコーティングされたシルバーミラー仕上げです。プラチナ・プロ・フォイルは、塩素、塩水、香水による外的損傷に強いのみならず、はんだ付けや電気めっきにも耐性を発揮するため、これまでにない耐久性を誇ります（例: art. 4120）。

アルミニウムフォイル（M）
真空コーティング加工による、アルミニウムミラー仕上げです（例、art. 2855 Flat Back HF）

ビーズおよびペンダント用保護層（P）
保護層はエフェクトの上に塗布する透明ラッカー層です。このラッカーはエフェクトにキズや指紋など損傷が付かないよう保護すると同時に、クリスタル・ストーンにケーシングやセッティングを使用しないジュエリー･デザインの場合にエフェクト層に湿気（汗など）が浸透して腐食することを防ぐ目的もあります。

フォイルなし（U）

HOTFIX TECHNOLOGY（ホットフィックス）

Hotfix（HF）
Hotfix 技術は、Flat Back の裏面に特別に開発された接着剤を塗布したものです。非常に柔軟性に富むこの接着剤は 120° C で活性化しますが、170° C まで加熱可能で、ベース素材に接着します。冷却過程でベース素材に永久的に固定されます。

Hotfix トランスペアレント（HFT）
Hotfix テクノロジーの一種ですが、特許のある結合剤をミラー仕上げのない Flat Back の裏側に使用するもので、クリスタルがベース素材のカラーを映し出し、‘水滴’のようなおもしろい効果が生じます。

この透明な結合剤はクリスタルラッカー PRO ・エフェクトとともに Flat Back にも使われます。

No Hotfix（No HF）
Hotfix 製品は、裏側に接着剤のない No Hotfix 製品としても販売されています。詳しくは弊社セールスサービスにお問い合わせください。

* プラチナカラーの保護層でコーティングされたシルバーミラー仕上げです。

표면 이펙트의 종류

2x
원석의 양면에 이펙트를 준 경우
(예: 품목 5328 AB 2x).

B
육면체의 3면에 이펙트를 준 경우
(예: 품목 5601 AB B).

V
이 이펙트는 역으로 코팅을 한 경우입니다. 반투명 이펙트를 표면 이펙트로 사용한 경우(예: 크리스털 뒷면에 품목 2420 NoHF SSHA V — Silver Shade 코팅 크리스털).

Z
원석의 일부에만 이펙트를 준 경우
(예: 품목 4869 HEL Z).

FC(전체 코팅)
향상된 기술로 비드 제품(품목 5000)에 고감도 메탈릭 이펙트를 완벽한 수준으로 균일하게 전체 적용할 수 있습니다.

CAL´V´SI 및 CAL´VZ´SI
CAL(Comet Argent Light) 이펙트는 특수한 경우에 표준 포일(A, F, ...)을 대신해 크리스털 뒷면 경면 코팅으로 이용되기도 합니다 (예: 품목 2035).

/G
부분 불투명 처리(PF) 또는 전체 불투명 처리(FF)된 표면을 가진 품목(예: 품목 2611/G).

특수 표면 이펙트
Swarovski는 크리스털 표면에 특수한 화학적 및 기계적 처리를 통해 다양한 특수 표면 이펙트를 낼 수 있습니다.

이펙트 코드	*이름*
MAT	Matt Finish

Matt Finish 이펙트는 크리스털의 전체 표면에 화학적 무광택처리를 하여 얻어집니다. 화학적 처리 과정에서 품목 사이즈에 약간의 변형이 발생할 수 있습니다.

포일

포일은 크리스털의 뒷면에 경면 코팅을 하는 것입니다.

실버 포일(A)
XIRIUS와 XILION Hotfix 제품만을 위한 은경 마감.

플래티늄 프로 포일(F)*
최고 품질 백금 색상의 보호층으로 코팅된 은경 마감. 플래티늄 프로 포일은 염소, 소금물, 향수 등의 환경적 영향에 대한 내구성뿐만 아니라 납땜, 전기도금 등의 가공도 견뎌 탁월한 내구성을 제공합니다 (예: 품목 4120).

알루미늄 포일(M)
배큠 코팅 공정을 통한 알루미늄 경면 마감 (예: 품목 2855 플랫백 HF).

비드와 펜던트용 보호층(P)
보호층은 이펙트 위에 적용되는 투명 래커 시스템입니다. 이 래커는 긁힘, 지문, 기타 손상으로부터 이펙트를 보호하도록 설계되었으며, 또한 크리스털로 디자인된 쥬얼리가 포장/세팅 안에 들어가지 않게 디자인된 경우 부식을 일으킬 수 있는 습기(특히 땀)가 이펙트 층 아래로 침투하는 것을 방지합니다.

언포일(Unfoiled) (U)

HOTFIX 기술

Hotfix (HF)
Hotfix기술은 특별히 개발한 접착제를 Flat Backs의 뒷면에 적용시킨 것입니다. 높은 유연성을 가진 이 접착제는120°C에서 최고 170°C의 온도 범위에서 활성화되어 부착물에 접착됩니다. 크리스털이 식으면서 접착물에 영구적으로 고정됩니다.

Hotfix트랜스패런트(HFT)
Hotfix기술의 변형으로 경면처리를 하지 않은 Flat Backs의 뒷면에 사용하는 특허 받은 부착 기술이며, 부착물의 컬러가 빗방울이 떨어진 것 같은 흥미로운 효과를 냅니다. 이러한 부착물은 Flat Back에서 래커프로 이펙트로도 적용됩니다.

No Hotfix (No HF)
Hotfix 품목은 뒷면에 접착제가 없는No Hotfix로도 생산됩니다. 보다 자세한 정보를 원하시면 Swarovski 현지법인에 문의하여 주십시오.

* 플래티늄 색상의 보호 층으로 코팅된 은경 마감

Варианты эффектов на поверхности

2x

Эффект наносится на обе стороны камня (например арт. 5328 AB 2x).

B

Эффект наносится на три стороны куба (например арт. 5601 AB B).

V

Эффект используется наоборот: покрытие, предназначенное для поверхности, наносится в качестве прозрачного эффекта (например арт. 2420 NoHF SSHA V – Silver Shade на обратной стороне).

Z

Эффект наносится только на часть поверхности камня (например арт. 4869 HEL Z).

FC (полное покрытие)
Усовершенствованная технология позволяет абсолютно равномерно наносить насыщенные металлические эффекты на всю поверхность бусин (арт. 5000).

CAL´V´SI И CAL´VZ´SI
В особых случаях (например арт. 2035) эффект CAL (Comet Argent Light) используется также в качестве зеркального покрытия на обратной стороне кристаллов вместо стандартного фольгирования (A, F и т.д.).

/G
Изделия с частично (PF) или полностью (FF) матированной поверхностью (например арт. 2611/G).

Особые эффекты на поверхности
Компании Swarovski удалось с помощью особой химической и механической обработки создать разные необычные эффекты на поверхности кристаллов.

Код эффекта	*Название*
MAT	Matt Finish

Эффект Matt Finish достигается за счёт химического матирования всей поверхности кристалла. В результате такой обработки размер изделий может немного варьироваться.

ФОЛЬГИРОВАНИЕ

Фольгирование – это процесс нанесения зеркального покрытия на обратную сторону кристаллов.

Фольгирование серебром (A)
Серебряное зеркальное покрытие только для кристаллов XIRIUS и XILION Hotfix.

Фольгирование Platinum* Pro (F)
На серебристое зеркальное покрытие наносится высококачественный защитный слой цвета платины. Фольгирование Platinum Pro отличается беспрецедентной прочностью: оно не только устойчиво к воздействию хлорки, солёной воды и парфюмерии, но и выдерживает такие процессы как пайка и гальванопластика (например арт. 4120).

Фольгирование алюминием (M)
Методом вакуумного напыления наносится алюминиевое зеркальное покрытие (например арт. 2855 Flat Back HF).

Защитный слой (P) для бусин и подвесок
Защитный слой – это прозрачный лак, который наносится поверх эффектов. Он предназначен для защиты от царапин, отпечатков пальцев и других повреждений. Кроме того, лак предотвращает коррозию, исключая попадание влаги (например пота) в слой эффекта, когда кристаллы используются в украшениях без оправ.

Без фольги (U)

ТЕХНОЛОГИЯ HOTFIX

Hotfix (HF)
Технология Hotfix предусматривает нанесение на обратную сторону кристаллов Flat Back специально разработанного клея. Он отличается гибкостью характеристик: кристаллы фиксируются при температуре от 120 °C до 170 °C. После охлаждения они прочно закреплены на материале основы.

Hotfix Transparent (HFT)
В этом варианте технологии Hotfix используется запатентованное связующее вещество, которое наносится на обратную сторону кристаллов Flat Back без зеркального покрытия и создаёт интересный эффект дождевой капли: кристалл приобретает цвет материала основы. То же прозрачное связующее вещество используется и с эффектами Crystal Lacquer[PRO] на кристаллах Flat Back.

No Hotfix (No HF)
Изделия серии Hotfix предлагаются также без клея на обратной стороне. В этом случае они относятся к категории No Hotfix. За дополнительной информацией обращайтесь в локальный отдел продаж Swarovski.

* Серебристое зеркальное покрытие с защитным слоем цвета платины.

ЗАКОНЫ, ПОДЗАКОННЫЕ АКТЫ, НОРМЫ И СТАНДАРТЫ

Состав незакреплённых и полуинтегрированных кристаллов, изготовленных по стандарту Advanced Crystal, соответствует отраслевым нормам и законодательству в отношении ограничения использования и запрета на использование определённых веществ в готовых изделиях в самых актуальных сегментах бизнеса наших клиентов. Дополнительная информация представлена на сайте SWAROVSKI-PROFESSIONAL.COM.

ПРЕДУПРЕЖДЕНИЯ

Общее предупреждение ⚠

Незакреплённые кристаллы, как и любые мелкие предметы, представляют опасность для детей, особенно в возрасте до трёх лет. В зависимости от размера кристалла и от того, какие материалы к нему прикреплены (например клей, ткань и т.д.), он может попасть в нос, в дыхательные пути или в пищевод ребёнка и в некоторых случаях вызвать удушение. Если проглотить изделие из кристаллов с магнитом, очень вероятно серьёзное повреждение кишечника. Методы закрепления, изложенные в «Руководстве по закреплению», не гарантируют, что кристаллы не открепятся. При изготовлении изделий с прикреплёнными кристаллами производитель должен постоянно следить за соблюдением требований, касающихся опасных мелких предметов, и оценивать риск для маленьких детей. Несоблюдение инструкций Swarovski по уходу может привести к повреждению кристаллов, что сопряжено с опасностью порезов и других травм.

Предупреждение в отношении посуды

Если кристалл открепится от посуды, он может попасть в дыхательные пути или в пищевод, вызвать удушение или повредить зубы. Чтобы такая опасность возникала как можно реже, не закрепляйте кристаллы на поверхностях посуды, которые будут соприкасаться с едой или оказываться во рту, и никогда не украшайте кристаллами посуду, предназначенную для детей. Если посуда с кристаллами рассчитана на использование только в декоративных целях, она должна быть помечена соответственно. Чтобы не повредить посуду, украшенную кристаллами, мойте её только вручную. Методы закрепления и рекомендации, изложенные в этом руководстве, не гарантируют, что кристаллы не открепятся. При изготовлении изделий с прикреплёнными кристаллами производитель должен постоянно следить за соблюдением требований в отношении опасных мелких предметов и объектов, соприкасающихся с пищей, и оценивать потенциальный риск для пользователей.
В ряде стран закон налагает ограничения на использование кристаллов (которые иногда содержат вещества, подлежащие контролю и представляющие опасность согласно местному законодательству) и клея при изготовлении посуды. Клиент несёт полную ответственность за соблюдение подобных требований, действующих в соответствующей стране, и обязуется защищать компанию Swarovski и снимать с неё всю ответственность в случае предъявления третьими лицами каких бы то ни было претензий к качеству товара и любых других претензий, касающихся использования изделий Swarovski. Кроме того, клиент обязуется не предъявлять компании Swarovski никаких претензий со своей стороны.

Использование не по назначению

Кристаллы Swarovski предназначены для одежды, украшений, аксессуаров, текстильных изделий и объектов дизайна интерьера. Ввиду их физических характеристик использовать кристаллы Swarovski не по назначению (например приклеивать их к зубам, закреплять на слизистой или рядом с ней, использовать другими небезопасными способами) нельзя. Клиент обязуется защищать компанию Swarovski и снимать с неё всю ответственность в случае предъявления третьими лицами каких бы то ни было претензий к качеству товара и любых других претензий, касающихся использования изделий Swarovski, приобретённых клиентом. Кроме того, клиент обязуется не предъявлять компании Swarovski никаких претензий со своей стороны.

Ответственность пользователя

Несоблюдение инструкций Swarovski по уходу может привести к повреждению кристаллов и повлечь за собой риск пореза и других травм. Все устные, письменные и основанные на результатах испытаний рекомендации компании Swarovski в отношении методов закрепления её изделий основаны на её сегодняшнем уровне знаний и на информации, предоставленной поставщиками. Эти советы не освобождают клиента от обязанности самостоятельно тестировать методы, которые он намерен задействовать, и проверять их пригодность для решения поставленной задачи. Пользователь несёт полную ответственность за применение этих методов и за обработку, закрепление и использование изделий.

CARE INSTRUCTIONS

A light layer of dust is most easily removed with a clean, dry, and antistatic cloth. To avoid unsightly fingerprints on the crystal, wear white cotton gloves during the cleaning process. For heavier dirt, lukewarm water with a little dishwashing detergent will suffice. Ideally you should use a damp and clean microfiber or thin, lint-free cotton cloth. Gently wipe each individual crystal and dry with a clean cloth. Again, wearing white cotton gloves is recommended.

When cleaning with moisture, make sure to use cleaning agents that do not damage the surrounding material. By correctly cleaning your Swarovski crystals, you will restore their full reflectivity.

Cloth

Not following Swarovski care instructions can damage the product and thus lead to damage of textiles or other damage.

Please note that with all standard washing processes (whether carried out by a household washing machine or via dry cleaning) the rotation of the drum places significant mechanical force on the textiles. The most important factor in ensuring a secure wash is correctly applying the product, without compromising its adhesion. The larger the product employed, and the more products that are applied next to each other, the greater the risk of damage. Swarovski products are made out of crystal or contain crystal and must thus be handled with suitable care.

In general, it is recommended that a soft wash bag is used and that the washer drum is filled to protect against damage. To maintain the quality of crystals from Swarovski, the following is also important: before washing, turn items of clothing inside out, select a gentle wash cycle, and use a mild detergent. According to DIN EN ISO 3758, our care instructions list all product groups, meaning each product used by customers must be assessed separately with regard to its washability and suitability for its purpose/the end product. The recommendations given by Swarovski reflect our current level of knowledge. Swarovski uses these recommendations to decide on the suitability of the product for textile applications. Customers are solely responsible for defining the recommended cleaning process for the end product, and must consider the care advice of Swarovski and any other manufacturers in doing so. The type of shape, cut, surface effect, and size, as well as the weight of the application and the quantity of crystals used have a significant impact on the cleaning process to be followed.

To avoid all risks, customers/textile cleaning companies should remove any large crystal stones, buttons, etc., that have been stitched on before cleaning, and stitch them back on again afterwards.

ROUND STONES

Round Stones are loose crystal elements. Most of them are pointed on the reverse side, making them easy to apply in either metal claw settings or pre-set cavities. The assortment features a wide variety of different cuts and sizes, the most innovative being the XIRIUS Chaton and the smallest being the XERO Chaton in size PP0. The science of the cut and the celebration of crystal as high art come together in the XIRIUS Chaton, Swarovski's most brilliant crystal element ever.

Merging a gemstone-like cut with rich, varied color and Platinum[PRO] colored foiling for exceptional durability, XIRIUS takes crystal one step closer to the diamond.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018.
For color and effect samples, please see the corresponding color chart.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

* Crystals are not resistant to plating and similar processing.
** Crystals are resistant to plating only if they are F-foiled.
*** designed by Jean Paul Gaultier
[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.
[2] The color Indian Siam is available only for a specific size range. Please refer to the current Collection.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.
Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

ATELIER MUNSTEINER FOR SWAROVSKI

DESIGNER EDITION

VISION ROUND STONE

The new Vision Designer Edition marks the first ever collaboration between Swarovski and Atelier Munsteiner, a German design house renowned for its multi-award-winning gemstone cuts, fine jewelry, and sculptures. The family-owned company's third-generation master craftsmen have drawn upon many years of experience to develop this stunning crystal innovation exclusively for Swarovski.

The Vision Designer Edition combines the uncomplicated appeal of simple cuts with the playfulness of mirrored reflections. These ingeniously crafted design elements bring to mind frozen water, with mysteriously encapsulated air bubbles forming a perfectly geometrical, flower-like shape within the crystal. It is available in three of the most popular shapes for Jewelry and Accessories – the round, square, and hexagon – offering endless design possibilities and making it ideal for use in Glamorous and Progressive creations.

It is the subtlety in the simplicity that makes this Designer Edition truly "VISIONARY."

OCEAN MYSTERIES
DESIGNED BY CÉLINE COUSTEAU

DESIGNER EDITION

Design Story: A love for the sea runs through her veins: Céline Cousteau is a celebrated filmmaker, humanitarian, and environmentalist, as well as the granddaughter of legendary ocean explorer Jacques-Yves Cousteau. She presents her first ever crystal designs for Swarovski, inspired by one of her favorite places, the depths of the ocean. Taking inspiration from nature itself and leaving its beauty unaltered, her stunningly life-like creatures are not only captivating and spellbinding, they also draw attention toward the mysterious, mostly unseen, and unexplored world beneath the ocean's surface on which all ocean life depends. These mysteries need to be protected for future generations, both above and below the water.

FANCY STONES & SETTINGS

Fancy Stones are available in numerous shapes, ranging from classical gemstone-inspired cuts to progressive trend cuts. They come in a huge assortment of different sizes and colors. Showing either a faceted or flat reverse side, Fancy Stones can be glued into pre-cast cavities or used in metal settings. Their precision-cut facets ensure the highest brilliance and lend design ideas a unique sparkle.

Settings are unplated or plated brass components, each specifically tailored to a Fancy Stone, which secure the crystal and allow for a myriad of application possibilities, including, but not limited to, sewing, soldering, and gluing.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018.
For color and effect samples, please see the corresponding color chart.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

* Crystals are not resistant to plating and similar processing.
** Crystals are resistant to plating only if they are F-foiled.
*** designed by Jean Paul Gaultier
[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.
Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

OCEAN MYSTERIES
DESIGNED BY CÉLINE COUSTEAU

DESIGNER EDITION

Design Story: A love for the sea runs through her veins: Céline Cousteau is a celebrated filmmaker, humanitarian, and environmentalist, as well as the granddaughter of legendary ocean explorer Jacques-Yves Cousteau. She presents her first ever crystal designs for Swarovski, inspired by one of her favorite places, the depths of the ocean. Taking inspiration from nature itself and leaving its beauty unaltered, her stunningly life-like creatures are not only captivating and spellbinding, they also draw attention toward the mysterious, mostly unseen, and unexplored world beneath the ocean's surface on which all ocean life depends. These mysteries need to be protected for future generations, both above and below the water.

ATELIER MUNSTEINER FOR SWAROVSKI

DESIGNER EDITION

VISION HEXAGON FANCY STONE

The new Vision Designer Edition marks the first ever collaboration between Swarovski and Atelier Munsteiner, a German design house renowned for its multi-award-winning gemstone cuts, fine jewelry, and sculptures. The family-owned company's third-generation master craftsmen have drawn upon many years of experience to develop this stunning crystal innovation exclusively for Swarovski.

The Vision Designer Edition combines the uncomplicated appeal of simple cuts with the playfulness of mirrored reflections. These ingeniously crafted design elements bring to mind frozen water, with mysteriously encapsulated air bubbles forming a perfectly geometrical, flower-like shape within the crystal. It is available in three of the most popular shapes for Jewelry and Accessories – the round, square, and hexagon – offering endless design possibilities and making it ideal for use in Glamorous and Progressive creations.

It is the subtlety in the simplicity that makes this Designer Edition truly "VISIONARY."

KAPUTT DESIGNED BY JEAN PAUL GAULTIER

DESIGNER EDITION

Design Story: While the whole world strives for perfection, Swarovski discovers the beauty of imperfection, guided and inspired by none other than design legend Jean Paul Gaultier. Together with Swarovski's own trend, design, and product management experts, Gaultier developed the spectacular Kaputt Collection exclusively for Swarovski. As its name, the German word for "broken," already suggests, the collection presents a technological innovation that deliberately breaks with convention. It celebrates the appeal of being different and unpredictable, which, according to the designer, is much more exciting than the precise and perfect.

Description: Broken and raw, but elegant at the same time, the Kaputt design captivates with distinctively irregular, partly unpolished, or frosted surfaces that give it an all-natural, almost meteoritic appearance. It comes in rich, shimmering metallic colors as well as classics such as Crystal and Crystal Golden Shadow, and boasts the famous Jean Paul Gaultier logo as a laser engraving.

Look: In a world of flawless, artificial beauty, Kaputt mirrors the attractiveness of irregular, natural surfaces for a down-to-earth look that is both rock and chic.

CRYSTAL SCARABAEUS GREEN DESIGNED BY JEAN PAUL GAULTIER

Design Story: Expressing his desire for an exclusive effect that would match his Kaputt Collection, haute couture icon Jean Paul Gaultier developed Crystal Scarabaeus Green together with a team of experts from Swarovski. For his effect he wanted this precise scintillating shade of green, combined with the mythological shimmer of the Egyptian scarab.

Description: Aptly named, Crystal Scarabaeus Green evokes the magic glow of the scarab, shimmering in green, blue, and purple with a metallic luster that combines bright and shadowy facets to create a stunningly graphic surface.

Look: With its beetle-like glow, Crystal Scarabaeus Green lends itself perfectly to nature-inspired and bold eco designs. It powerfully mimics nature and sets a rebellious statement for any eco-warrior. However, its shiny surface also evokes an otherworldly appearance that echoes futuristic, stellar avant-garde looks. The metallic rainbow hue caters to the sporty sci-fi appeal that celebrates state-of-the-art technology and transports us into other dimensions.

TRIBUTE TO TRIBE COLLECTION
DESIGNED BY CÉLINE COUSTEAU

DESIGNER EDITION

Inspired by her project Tribes on the Edge and through experiences with indigenous tribes in the Brazilian rainforest, environmentalist and humanitarian Céline Cousteau presents her second Designer Edition for Swarovski: pristine tribal symbols that celebrate the interconnection of mankind to nature. The *Oval Tribe Fancy Stone* stands for a new design ethos where global references and mediums are mixed-and-matched to create a contemporary appreciation of the remote and unknown. *The Rhombus Tribe Fancy Stone* is a beautiful rendition of a tribal inspired design, inviting us to embrace a multi-cultural future. As an international, almost universal symbol, the cross is deeply rooted in every culture. As such, the Cross Tribe Pendant incorporates the message of social responsibility, mutual respect and pluralism.

ILLUSIONS DESIGNED BY CHRIS BANGLE

DESIGNER EDITION

A TILTED VIEW

Chris Bangle is no stranger to polarising, provocative designs. The now legendary former BMW Chief of Design, who left the company in 2009 to pursue other design passions and who has since opened up his own collaborative design studio in Piemonte, Italy, was famed during his tenure for aggressive, emotional car designs.

Small wonder this made him a perfect candidate to imagine crystals for Swarovski's Designer Edition Series that are both evocative and dimension defying. His tilted take on crystal geometry manages to exude both space and dimension, even while appearing intrinsically flat. His crystalline form compresses the third dimension along its axis, leaving behind a decidedly 2.5D feel in a crystal that nevertheless retains volume.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018.
For color and effect samples, please see the corresponding color chart.

Please check the Swarovski Collection 2018 for all available crystal color and AB coating variations.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

* Crystals are not resistant to plating and similar processing.

*** designed by Jean Paul Gaultier

[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process.
In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.

Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview.
Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018.
For color and effect samples, please see the corresponding color chart.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

* Crystals are not resistant to plating and similar processing.
** Crystals are resistant to plating only if they are F-foiled.
*** designed by Jean Paul Gaultier
[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.
Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

[A] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process.
In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.
[B] Effects in the standard assortment are only available for 6868 as partly coated.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.
Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview.
Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

MAISON MARGIELA FOR SWAROVSKI

DESIGNER EDITION

CRYSTALACTITE PENDANTS

Since 1988, Paris-based Maison Margiela has become famous for its collaborative team-led approach and its avant-garde transformation of classic designs. In July 2013, it presented the *Maison Margiela Crystalactite for Swarovski* at its Paris Haute Couture show. These were groundbreaking Crystal Fusion components inspired by natural stalactite forms and developed in creative partnership with Swarovski. Now Swarovski presents its interpretation of this innovative cut in pure crystal – the *Crystalactite Pendant*. Featuring a progressive aesthetic combining partly frosted facets with primeval, irregular icicle shapes, the vision that originated in our wildest landscapes has now been perfected by one of the most sophisticated design houses. With an easy-to-use hole at the top, the Pendant offers myriad design possibilities for strong, contemporary designs, and for recreating haute-couture looks.

"Naturally and spontaneously, an imposing crystal emerges from its raw, stony origin, patiently growing into its iconic stalactite shape."

"LOVE STORY OF THE HEART" BY MANISH ARORA

DESIGNER EDITION

Since the beginning of his international career, the award-winning, Delhi-based designer Manish Arora has worked creatively with Swarovski. In 2009, he created a memorable collection of crystalline Transfers. One year later, India's best-loved and most prolific design talent renewed his partnership with Swarovski and created a special collection of heart-shaped crystal pendants, which were launched in February 2011. Each individual piece is an expression of love's different emotional states and is named accordingly.

The partnership with Manish Arora is symbolic of how Swarovski engages in mutually rewarding creative partnerships with the world's best and brightest design spirits.

"The heart shape is very close to me because it is the universal symbol of love. I wanted to bring this symbol to life by creating a collection of crystal pendants and I hope people will wear them as a personal expression of the beauty and purity of this emotion." Manish Arora

OCEAN MYSTERIES
DESIGNED BY CÉLINE COUSTEAU

DESIGNER EDITION

Design Story: A love for the sea runs through her veins: Céline Cousteau is a celebrated filmmaker, humanitarian, and environmentalist, as well as the granddaughter of legendary ocean explorer Jacques-Yves Cousteau. She presents her first ever crystal designs for Swarovski, inspired by one of her favorite places, the depths of the ocean. Taking inspiration from nature itself and leaving its beauty unaltered, her stunningly life-like creatures are not only captivating and spellbinding, they also draw attention toward the mysterious, mostly unseen, and unexplored world beneath the ocean's surface on which all ocean life depends. These mysteries need to be protected for future generations, both above and below the water.

TRIBUTE TO TRIBE COLLECTION
DESIGNED BY CÉLINE COUSTEAU

DESIGNER EDITION

Inspired by her project Tribes on the Edge and through experiences with indigenous tribes in the Brazilian rainforest, environmentalist and humanitarian Céline Cousteau presents her second Designer Edition for Swarovski: pristine tribal symbols that celebrate the interconnection of mankind to nature. The *Oval Tribe Fancy Stone* stands for a new design ethos where global references and mediums are mixed-and-matched to create a contemporary appreciation of the remote and unknown. The *Rhombus Tribe Fancy Stone* is a beautiful rendition of a tribal inspired design, inviting us to embrace a multi-cultural future. As an international, almost universal symbol, the cross is deeply rooted in every culture. As such, the Cross Tribe Pendant incorporates the message of social responsibility, mutual respect and pluralism.

KAPUTT DESIGNED BY JEAN PAUL GAULTIER

DESIGNER EDITION

Design Story: While the whole world strives for perfection, Swarovski discovers the beauty of imperfection, guided and inspired by none other than design legend Jean Paul Gaultier. Together with Swarovski's own trend, design, and product management experts, Gaultier developed the spectacular Kaputt Collection exclusively for Swarovski. As its name, the German word for "broken," already suggests, the collection presents a technological innovation that deliberately breaks with convention. It celebrates the appeal of being different and unpredictable, which, according to the designer, is much more exciting than the precise and perfect.

Description: Broken and raw, but elegant at the same time, the Kaputt design captivates with distinctively irregular, partly unpolished, or frosted surfaces that give it an all-natural, almost meteoritic appearance. It comes in rich, shimmering metallic colors as well as classics such as Crystal and Crystal Golden Shadow, and boasts the famous Jean Paul Gaultier logo as a laser engraving.

Look: In a world of flawless, artificial beauty, Kaputt mirrors the attractiveness of irregular, natural surfaces for a down-to-earth look that is both rock and chic.

YOKO ONO

DESIGNER EDITION

Yoko Ono is a multimedia artist whose thought-provoking work challenges people's understanding of art and the world around them. Her work as a conceptualist has encompassed performance, instructions, film, music, writing, and now jewelry inspiration for Swarovski.

Born in Tokyo in 1933, she moved to New York in 1953, where she became part of the city's vibrant avant-garde scene. She went on to perform and exhibit what have now become legendary works in the history of contemporary art, including her famous 1969 collaboration, Bed-In, with husband John Lennon.

She has had numerous exhibitions in museums, and in 2009, received the Golden Lion for Lifetime Achievement from the Venice Biennale. In 2011 Ono was honored with the prestigious 8th Hiroshima Art Prize for her dedicated peace activism, and in 2012 received the Oskar Kokoschka Prize in Vienna.

THE COOPERATION

A memorable key-shaped crystal pendant, inspired by Yoko Ono, has been designed for Swarovski. The design itself is a technical masterpiece and tells us a wonderful story around the symbol of the key.

THE STORY

"Imagine a key that unlocks the door
to the forest with its secrets,
to the sky with its peacefulness,
to the universe with its infinity,
to a future with the promise of a better life."

Yoko Ono

This concept by Yoko Ono has been created as a crystal "KEY TO OPEN THE FOREST" exclusively for our Swarovski collection. It embodies the spirits of earth and sky, and reflects the multiple colors of nature. "Make a promise to a tree. Ask it to be passed on to other trees." When you wear it you will be sharing Yoko's dream of peaceful interaction with the world around you. "Whisper your dream to a cloud. Ask the cloud to remember it."

GROWING CRYSTAL
DESIGNED BY IRIS VAN HERPEN

DESIGNER EDITION

Iris van Herpen boldly envisions the future of fashion.For Swarovski's Designer Edition Series, van Herpen imagined two pendants inspired by the creative power of nature. The first, Growing Crystal Rhombus, pays homage to the fractured and fissured elegance of crystals shaped by tectonic forces. The second, Growing Crystal Rectangle, resembles the cross section of a druse crystal in both brilliance and complexity. In each instance, van Herpen highlighted the metamorphosis of crystalline forms under the influence of time: "For beauty yet becoming."

In addition to the pendants she created for the Designer Edition Series, the collaboration with van Herpen also triggered Swarovski to create special 3D Studs, which make it simple to achieve eye-catching relief. Available in three heights, three different plating options, two different cuts, and twenty color and effect options, they are ideal for adding texture and depth to garments for added design freedom.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

* Crystals are not resistant to plating and similar processing.
** Crystals are resistant to plating only if they are F-foiled.

[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.
[2] Only available in limited sizes.
[3] In these colors art. 2088 is available as a foiled or unfoiled version.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.
Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

DIAMOND LEAF[1]

DESIGNER EDITION

Swarovski and Giorgio Armani worked together to create an exclusive crystal called Diamond Leaf. This Designer Edition has a fluid, organic shape reminiscent of a leaf. Precision-cut facets melt into the softness of a floating, sculptural form, contrasting strength and fragility, the timeless with the ethereal.

Giorgio Armani: "Swarovski crystal brings a touch of magic to a dress, an ethereal quality, a luster that never fails to captivate the attention."

FLAT BACKS HOTFIX

Flat Backs Hotfix are loose crystal elements with a flat reverse side that has been pre-coated with a heat-sensitive glue. These Flat Backs can be easily applied to a large range of textile carrier materials using heat to produce a durable and long-lasting crystal effect.

Flat Backs Hotfix are available in a multitude of colors, shapes, and cuts. The increased light reflection and warmer appearance of the Flat Back Rose are achieved through a special silver mirror on the reverse side.

The most innovative single item in this product group is art. 2078 XIRIUS Rose, with the most progressive and unique cut on the market: multilayer cut technology, producing the inspiring XIRIUS star design. Superior shine and rich, well-balanced refraction of light redefine the market standard.

Swarovski's outstanding quality in crystal elements is underlined by the highest precision in table size and diameter.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018.
For color and effect samples, please see the corresponding color chart.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

* Crystals are not resistant to plating and similar processing.
** Crystals are resistant to plating only if they are F-foiled.
*** designed by Jean Paul Gaultier
[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.
[2] Only available in limited sizes.
[3] In these colors art. 2088 is available as a foiled or unfoiled version.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.
Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

SEW-ON ARTICLES

Sew-on Articles are loose crystals that can be easily sewn either by hand, or with a standard domestic or industrial embroidery sewing machine onto any kind of textile or accessory. Sew-on Articles come in two- or three-hole varieties, with round and oval holes for use in a wide range of decorative applications, from fine embroidery to jewelry. Lochrosen are crystals with just one hole. Sew-on Articles have rounded edges around the holes to guarantee thread protection.

The assortment offers a great variety of colors and effects to transform textiles and fashion accessories into bespoke luxury items.

The most important items in this product group are art. 3188 XIRIUS Lochrose and art. 3288 XIRIUS Sew-on Stone, which feature the most progressive and unique cut on the market: multilayer cut technology, creating the inspiring XIRIUS star design.

[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

DIAMOND LEAF[1]

DESIGNER EDITION

Swarovski and Giorgio Armani worked together to create an exclusive crystal called Diamond Leaf. This Designer Edition has a fluid, organic shape reminiscent of a leaf. Precision-cut facets melt into the softness of a floating, sculptural form, contrasting strength and fragility, the timeless with the ethereal.

Giorgio Armani: "Swarovski crystal brings a touch of magic to a dress, an ethereal quality, a luster that never fails to captivate the attention."

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018.
For color and effect samples, please see the corresponding color chart.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

* Crystals are not resistant to plating and similar processing.
** Crystals are resistant to plating only if they are F-foiled.
*** designed by Jean Paul Gaultier
[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process.
In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.
[2] Only available in limited sizes.
[3] In these colors art. 2088 is available as a foiled or unfoiled version.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.
Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists.

SPECIAL MOTIF SERVICE

A special motif is any individual design created by the customer that differs to the Transfers Standard, or Crystal Inspiration Collection. This service opens up an abundance of customization possibilities. You also no longer need to set your motif by hand. You can rely on Swarovski's long-standing experience and design expertise and can order a convenient, ready-to-apply design. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special requirements – such as a brand image or an image for a particular sales campaign or garment. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

CUSTOMIZATION POSSIBILITIES

- Change of elements in an existing motif
- Change of size of an existing motif
- Logos or brand names
- Creation of pieces or rows
- Up to nine colors possible per Transfer motif

For Transfers Unlimited
- Up to 18 elements possible per transfer motif
- max. motif size: 470x205 mm

ORDERING PROCESS

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Transfers, Crystal-it, Crystal Mesh, etc.). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes are required. Your special motif will be produced and delivered following your confirmation.

PLEASE NOTE

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note that ordering a design does not grant exclusive production of this design to the customer.

SPECIAL MOTIF SERVICE

A special motif is any individual design created by the customer that differs to the Self-adhesive Elements Standard or Crystal Inspirations Collections. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is also available (see "Customization Possibilities" below). You can also submit design sketches that meet your special requirements, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal-It Infinity

- Change of elements and colors of elements of an existing motif
- Change of size of an existing motif
- Logos or brand names
- Up to 9 different elements per motif are possible

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal-it, Crystal Fabric-it, Crystaltex-it, Crystaltex-it Chaton, Crystal Fine Rocks-it).

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes are required. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If you are sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note that ordering a design does not grant exclusive production of this design to the customer.

If detailed information on potential tolerances is needed (e.g. cavity production for metal parts), please contact Swarovski who will enter an application request into our application database.

SYNTHETICS

AVAILABLE SYNTHETIC PRODUCTS AND FIELDS OF APPLICATION

Synthetics combine elegant crystals from Swarovski with different adhesive systems already applied on the reverse side of the product, each optimized for certain carrier materials and fields of application. They are ideal for use in textiles, interior, jewelry, and DIY, as well as in the accessories segment, and offer numerous sparkling design possibilities.
Due to its outstanding bonding performance, Synthetic **Hotfix** is perfect for a variety of textile applications with high performance requirements. Synthetic **Coldfix**, however, is a product developed especially for materials that are not suitable for Hotfix applications, such as real and artificial leather and functional fabrics.
Synthetic **IT** products, on the other hand, are ready to apply and perfect for solid materials such as paper, metal and glass, allowing easy and fast application.

Hotfix film
(thermoplastic polyurethane)

White protective film

- Application on carrier materials which are suitable for Hotfix application. (e.g. cotton/ polyester blend, denim, Alcantara®,...)

Coldfix film
(pressure sensitive adhesive)

Yellow protective film

- Heat-sensitive carrier materials (e.g. silk, cashmere, real and artificial leather ...)
- Pressure-sensitive carrier materials (e.g. wool, real and artificial leather ...)
- Textiles with a low level of absorbency (e.g. functional fabrics with water-repellent coating, ...)
- Easy and fast embellishment of finished products

IT film
(pressure sensitive adhesive)

White protective film

- Solid materials such as glass, metal, paper, etc.

To ensure the best possible result, test applications on the intended carrier material are strongly recommended. For information especially regarding material limitations please refer to our Application Manual.

Any oral, written, or test-based advice that Swarovski provides regarding techniques for the application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. **Such advice does not discharge customers from carrying out their own tests on techniques they propose to use, and the suitability of these techniques for the intended application.** The application, use and processing of these techniques and products are solely the user's responsibility.

GRAPHIC FABRIC, ULTRAFINE ROCKS, FINE ROCKS & ROCKS

Synthetics such as Crystal Rocks, Crystal Fine Rocks, Crystal Ultrafine Rocks, and Crystal Fabric combine elegant crystals from Swarovski with synthetic carrier materials that can be applied using Hotfix or IT (self-adhesive) technology. They are ideal for use in the textiles, interior design, jewelry, and accessories segments.

GRAPHIC FABRIC, ULTRAFINE ROCKS, FINE ROCKS & ROCKS

Taking the word "image" from "imagination" and leading it to new creative heights, Swarovski presents a new graphic technology that opens up a world of design possibilities – in an unprecedented richness of detail!

The Graphic products allow for the printing of individual motifs – such as pictures, graphics, logos, or lettering – onto customer favorites Crystal Fabric, Crystal Rocks, Crystal Fine Rocks, and Crystal Ultrafine Rocks.

The two different printing methods, either on top of or underneath the crystal, or a combination of the two, enrich your personal motif with a sparkling 3D surface for stunning effects in a series of application fields.

As a true highlight and stunning innovation in our assortment, the Graphic Fabric, Ultrafine Rocks, Fine Rocks, and Rocks speak to the rising demand for personalized design items, emphasizing our desire for an individual look in a world of mass production.

GRAPHIC OFFERS DIFFERENT PRINTING METHODS:

Foil Print (FP)

The motif is printed on the foil below the crystal, which means...

- The brilliance of the crystal remains
- Blurred contours can be used as a design element, e.g. for mille-fleurs motifs

Glass Print (GP)

The motif is printed on crystal, which means...

- Highly precise reproduction of the motif, even of tiny details and small fonts
- No blurring occurs
- Matt effect can be used as a design element

Combination of Foil & Glass Print (FP&GP)

- Spectacular depth effects
- Highlighting special features of the design

Please note: Due to their physical properties, Swarovski's self adhesive products are unsuitable for other uses such as gluing onto teeth, using on or near mucous membranes, and other unsafe uses.

INFORMATION ON GRAPHIC FABRIC

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to benefit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below).

You can also submit design sketches that meet your personal requirements, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Required information for Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks

data format contour/outline	vector graphics (.dxf, .ai, .eps, .dwg)
data format picture	raster image format (.tiff, .pdf, .psd, .png) / vector format (.ai, .eps, .pdf)
picture resolution & size	min. 300dpi (real size)
colors	RGB or CMYK
fonts	convert text to paths/outlines

Due to the different print methods (print on foil or glass), the colors may vary. Please be aware that possible color variations are more visible on single-color motifs than on images with many different colors. If you require information and possible print tolerances (offset, color tolerance, etc.) please contact Swarovski and an application request will be entered into our application database.

Customization Possibilities for Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks

Due to production requirements, motifs with edges and angles of less than 90° need to be rounded off.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks).

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes are required.

Your special motif will be produced and delivered following your confirmation.

Important information

Please always submit the drawing of your desired motif in the actual size you require. When enlarged to the desired size, a small sketch will have blurred lines that will make it difficult to correctly reproduce. Full-scale pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. If the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Due to the tolerance level of the crystals being applied onto carrier film, the final Graphic Fabric, Ultrafine Rocks, Fine Rocks, and Rocks motifs may slightly differ from the sketches or prints in relation to the motifs' outline. Therefore the product may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

If detailed information on possible tolerances (e.g. cavity production for metal parts) and print tolerances is required (offset, color tolerance, etc.), please contact Swarovski and an application request will be placed in our application database.

If considered feasible, special productions are generally offered to all our customers. Please note: special productions are subject to acceptance by Swarovski and ordering a design does not automatically grant exclusive production of this design for the customer.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI-PROFESSIONAL.COM or contact your Swarovski sales office.

Please take care with deep-colored fabrics and artificial leather (e.g. denim and alcantara). Some fabrics may bleed after application or washing. If detailed information is required (product information), please contact Swarovski, who will enter an application request into our application database.

CRYSTAL FABRIC BANDINGS

CRYSTAL FABRIC

Crystal Fabric is another inventive product to make a luxurious statement within a variety of different segments, for example textiles, accessories, jewelry, eyewear, and watches. Depending on the color and surface of the carrier material, Crystal Fabric with transparent film changes its look dramatically. Crystal Fabric on a black film creates a deep, mysteriously soft gleam, dressed up with a very alluring sparkle.

SPECIAL MOTIF SERVICE

A special motif is any individual design created by the customer that differs to the Crystal Fabric Standard, Crystal Inspiration, or Special Collections. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below).

You can also submit design sketches that meet your special requirements, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Fabric

- Max. motif size: 600x1800 mm
- Min. motif size: of 10x10 mm or effective surface of 1 cm^2
- Min. width of gaps within motifs: 3 mm
- Min. Crystal Fabric surface: 3 mm
- Min. size of the smallest element within a motif: 10x10 mm or effective area of 1 cm^2

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Fabric). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 3 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Fabric motifs may differ from the sketches or prints in relation to the motifs' outline, especially with spaces that are smaller than 3 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note that ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Rocks

- Min. size: 15x15 mm or effective surface of 2.25 cm^2
- Max. size: 400x330 mm
- Min. Crystal Rocks surface: 9 mm
- Min. width of gaps within motifs: 3 mm
- Min. size of smallest element within a motif: 15x15 mm or effective area of 2.25 cm^2

Due to production requirements, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 3 mm.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Rocks motifs may differ from sketches or prints in relation to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Fine Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Fine Rocks

- Min. size: 15x15 mm or effective surface of 2.25 cm^2
- Max. size: 400x330 mm
- Min. Crystal Fine Rocks surface: 4 mm [1]
- Min. width of gaps within motifs: 3 mm
- Min. size of the smallest element within a motif: 15x15 mm or effective surface of 2.25 cm^2

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Fine Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Fine Rocks Motifs may differ from sketches or prints in relation to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

[1] Bandings (strips over 100mm in length) in 5mm widths cannot be produced.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Ultrafine Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Ultrafine Rocks

- Min. size: 15x15 mm or effective surface of 2.25cm²
- Max. size: 400x330 mm
- Min. Crystal Ultrafine Rocks surface: 3.4 mm
- Min. width of gaps within motifs: 3 mm

Due to production requirements, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 1 mm (diameter Ø 2mm).

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Ultrafine Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI-PROFESSIONAL.COM or contact your Swarovski sales office.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Galuchat Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Galuchat

- Min. size: 19x19 mm or effective surface of 3.61 cm²
- Max. size: 400x330 mm
- Min. Crystal Galuchat surface: 9 mm
- Min. width of gaps within motifs: 7x7 mm or effective surface of 0.49 cm²
- Min. gap between motif outlines: 6 mm

Due to production process requirements, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 1.5 mm.

Two-colored motifs

Customers are able to create a combination out of the Crystal Galuchat standard color assortment (e.g. large and small crystal balls in 001 AB and the round uncut elements in 001 CAL).

It is not possible to mix three different colors - both crystal balls (3.5 and 2.5 mm) must be the same color.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Galuchat). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Galuchat motifs may differ from sketches or prints in relation to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer. If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

SPECIAL MOTIF SERVICE

A special motif is any individual design created by the customer that differs to the Metal Trimmings Standard or Crystal Inspirations Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special requirements, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities

- Change of size of an existing motif
- Logos or brand names
- Creation of pieces or rows
- Up to nine colors/elements possible per Metal Trimming
- For thread and net edge options please see the respective matrix for all available options.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Metal Trimmings). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note that ordering of a design does not grant exclusive production of this design to the customer.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Mesh Standard or Crystal Inspirations Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities

- Change of size of an existing motif
- Logos or brand names
- Creation of single motifs or rows
- Up to nine colors are possible per Crystal Mesh Motif.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Mesh). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2018. For color and effect samples, please see the corresponding color chart.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI-PROFESSIONAL.COM). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

** Crystals are resistant to plating only if they are F-foiled.

[1] Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.

[2] The color Indian Siam is available only for a specific size range. Please refer to the current Collection.

Classic Colors/Effects: This color range offers a wide choice of traditional Swarovski crystal colors and effects.

Exclusive Colors/Effects: This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to certain industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam (option to Lt. Siam) and Tangerine (option to Sun) conform to all CLEAR-lists.

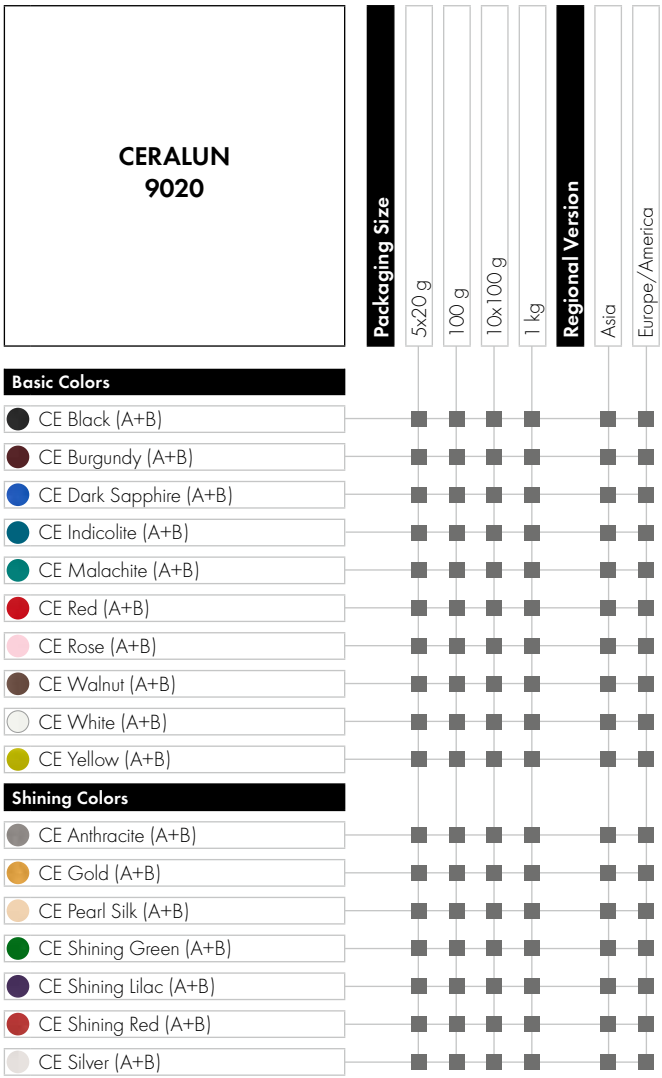
CERALUN

Ceralun is a versatile and strong two-component, high-performance ceramic epoxy composite. This clay has been specifically developed and tailored to embed foiled and unfoiled crystals. It is an absolutely essential material for innovative design. Ceralun has a high level of hardness, rigidity, and shock absorbance. It is resistant to sweat, humidity, or climatic changes, and shows no signs of age.

AVAILABLE PACKAGING VERSIONS AND COLORS



Please note: packaging contains the total amount of Ceralun, e.g. 100 g = 50 g component A and 50 g component B (mixing ratio 1:1).

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Citrine, Fireopal, Hyacinth, Light Siam, Siam, and Yellow Opal varies according to industry regulations. Those regulations are indicated with * in the compliance overview. Indian Siam (option to Lt. Siam) and Tangerine (option to Sun) conform to all CLEAR-lists.
