SWAROVSKI WORLDWIDE

SWAROVSKI STRASS® LIGHTING COMPONENTS

Perfection is achieved with perfect ingredients. The secret to Swarovski crystals' unrivaled brilliance lies in purity of material, precision cutting, individual quality control, and perfect polishing.

The Swarovski STRASS® Lighting assortment consists of components ranging from classic to contemporary shapes, including highly complex cuts.

Swarovski offers highest precision, quality and clarity of crystal that ensure easy application and

durability of designs. These are all benefits from our premium brand solution that guarantee your design pieces "Made with Swarovski" are always exceptional. The collection offers a broad choice of shapes in sparkling and inspiring colors and various tantalizing effects.

For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Lighting Collection. Special Requests will be checked individually; we reserve the right to reject enquiries for production reasons. Slight changes in shades are unavoidable. Some effects may only be available on special request.

CERTIFICATE OF AUTHENTICITY

The seal „crystals from Swarovski“ serves as a certificate of authenticity for products with genuine Swarovski crystals.

QUALITY SIGNATURE

To provide the assurance of original quality, Swarovski Lighting components* carry the permanent, laser-engraved Quality Signature. Please note that for design reasons or technical limitations the Quality Signature is not included on certain components.

* Clear crystal 12 mm and above, colored crystal 18 mm and above. No signature with the colors Arctic White, Bordeaux, Jet and Emerald. You will find the location of the Quality Signature marked by a red dot on component line drawings.  and Swarovski® are registered trademarks by Swarovski AG.

ADVANCED CRYSTAL
THE NEW DNA OF CRYSTAL

The advantage to being first is that you get to set the agenda. Throughout its long history, Swarovski has pioneered technologies and accomplished visions that have made waves far beyond the bounds of its own industry. Now Swarovski is stepping forward to announce a dramatic change in the DNA of its crystal: the Advanced Crystal standard.

Advanced Crystal standard – a new, innovative lead-free* crystal composition, complying with current laws and regulations governing the use of certain substances in finished products in the most relevant segments of our customer’s business, and which is patented by Swarovski in the US, Japan and 16 European countries.

* Crystal glass and all other materials containing 0.009 % lead or less.

MAKING BEAUTY MEASURABLE:
5CS FOR QUALITY

Beauty, as the saying goes, is in the eye of the beholder. The incomparable precision-cut crystals from Swarovski conveys beauty in all its diverse forms. Above and beyond subjective perception, the quality and value of crystal can be determined by objective criteria regardless of the material of which it is composed. Just as the value of a diamond is graded on the basis of the ,4 Cs‘, the value of a crystal is determined by the ,5 Cs‘.

Swarovski is continually streamlining and developing each one of these five quality criteria and thus meets the highest standards with utmost precision, resulting in unrivalled brilliance.

Cut. Only cutting of the greatest precision is capable of lending crystal exceptional brilliance. Exact faceting is required to wholly achieve the prismatic effect of the crystal and bring out its full beauty. The more precisely the crystal is cut, the greater its brilliance.

Clarity. Crystal only has purity and clarity to the extent that it is free of inclusions such as cloudy spots, streaks, and bubbles. This requires the purest raw material and processing techniques that are carried out flawlessly.

Color. Perfect crystal is also characterized by color intensity and fidelity, independent of size and cut. If a crystal reflects light particularly well and disperses all its spectral colors, it will give rise to a fiery play of color in both the crystal and the immediate environment.

Contour. Meticulous quality control in Swarovski’s manufacturing process ensures perfectly shaped, flawlessly faceted crystals.

Care. Sustainability concerning the selection and composition of ingredients, responsible production, and conscientious handling of legislation, customers, and the environment are essential values in modern crystal production.

SWAROVSKI CRYSTAL STRANDS

PINNED AND STAINLESS STEEL

From the silver screen to the Oscars, Crystal Strands from Swarovski have long become a design darling among creative minds throughout the world, as they create an intense and complex look with a simple technique.

A large variety of colors, effects, and shapes is strung together in trickling, sparkling rows of crystal, providing an endless source of inspiration

for spectacular 2D and 3D installations and unmatched space-altering effects.

ENDING VARIETIES

Standard Stainless Steel Crystal Strands are available with two different endings: Loop and open ending.

The following pages list all available varieties. Please note that according to its type of ending and pattern each strand has been assigned a specific system number.

Please note: The exact location of laser logos on individual components of the strands is indicated in the corresponding component section.

IMPORTANT NOTICE

Crystal Strands are intended for DECORATIVE USE ONLY. Because of their unique physical properties, Swarovski crystals are not suitable for use in applications that consist of free-flowing strands and bring the crystals into contact with one another, which could damage them (such as functional curtains, partitions, stage decorations, etc.). It is up to the client to assess whether the strands are suitable for use in the intended application. The application, use and processing of these products are solely the responsibility of the client, who

agrees to defend and indemnify Swarovski, as well as hold Swarovski harmless from any and all claims by third parties based on product liability or otherwise relating to uses of Swarovski products the client has purchased, and waives all claims of its own. Please read instructions and warning notices in the Price List and the Swarovski Application Manual.

For customized varieties of Crystal Strands, please contact your local sales office.

COLLECTION 2017/2018

CRYSTAL SURFACES

A look beneath the surface. Swarovski presents its latest crystalline sensation:
The cutting-edge Crystal Surfaces with unprecedented sparkling effects.

This stunning collection of surface treatments is set to push the boundaries of crystal application within the field of high-end outfitting. It offers limitless and unrivaled crystal interior solutions in terms of quality, diversity and creativity.

ACTIVE PANEL

Tactile, sparkling and high-polished, the Active Panel combines the luminous power of 200,000 crystals per square meter with a backlighting of special LED´s. Active Panel comes in a variety of color and shape options.

Crystals are glued on a glass per square meter. The lighting is created with a specially designed LED solution, which creates the perfect sparkle of the crystals. The LED boards are modular, enabling the realization of a variety of shapes and sizes.

CRYSTAL ROCKS

An all-time favorite and a brand-new favorite, Crystal Rocks and Crystal Fine Rocks truly “rock” every design. Their spiky yet smoothly sophisticated tactile surface creates stunning 3D effects.

Crystal Rocks or Crystal Fine Rocks, applied to various solid materials like aluminum, MDF, glass or Corian but also on Alcantara.

CRYSTAL COMPOUND

With Crystal Compound, designers enjoy the spectacular 3D effect of Crystal Rocks, but with being laminated between two layers of glass the surface is entirely smooth and perfectly even.

Available in special shapes with customizing options regarding cutting, color, print, size, and back layer materials, Crystal Compound creates stunning effects when used for indoor/outdoor applications, table tops, bar tops and fronts,

separator walls and wall coverings, flooring inlays, stairs, doors, furniture inlays, balconies and facades. Due to its easy-to-clean, hygienic surface it lends itself particularly for wet environments, for mirrors, shower walls, and backsplashes.

CRYSTAL GRID

Using one of the up-to-date innovations from the Swarovski product range to its fullest effect, Crystal Grid features Crystal Rocks and Crystal Fine Rocks. This smooth element with its subtle sparkle can be laminated in three different ways:

SOFT SURFACE

Crystal Rocks or Crystal Fine Rocks, applied with hotfix-technique on Alcantara® fabric

COMPOUND SURFACE

Crystal Rocks or Crystal Fine Rocks, laminated between two layers of clear glass

HARD SURFACE

Crystal Rocks or Crystal Fine Rocks, applied on HPL (high-pressure laminate) applied to aluminum, MDF or glass

From stunning facades outside to fresh, clear spa areas inside, the Classic Panel offers it all. Its hygienic, easy to clean glass surfaces and customized scaling solutions recommend the Classic Panel for sparkling, LED-lit interiors, for walls, and thanks to its enhanced safety glass also for ceilings and floors. Without LED illumination it adorns every outdoor space.

HEXAGON PANEL

With its world-famous honeycomb design, Swarovski has already pushed architectural boundaries. Hexagon Panel is an homage to this one-of-a-kind surface effect, that has sparkled on spectacular facades all over the world.

Crystal in a hexagon shape is applied onto a front glass sheet creating stunning depth and detail.

Hexagon Panel makes a good first impression – wherever it adorns the room. Be it as wall decoration, room panel, room divider, as front

glass facade or as a bar or reception desk. It offers customized scaling solutions, different lacquering options, and with its outshining brilliance and hygienic, easy to clean glass surface it creates the perfect backdrop for high-class food & beverage environments.

SWAROVSKI CRYSTAL PALACE

AVALON and PARADISIUM designed by Fredrikson Stallard

Swarovski Crystal Palace is a revolutionary project that has aimed to create signature interpretations of light & design using the emotive medium of cut crystal. While celebrating & reinterpreting the rich traditions of the chandelier, Swarovski Crystal Palace has broken barriers, played with the rules and opened a new chapter in the history of lighting, art and design.

The relaunched Swarovski Crystal Palace collection comprises 16 pieces by 6 designers, including Fredrikson Stallard, Tord Boontje, Yves Behar, Vincent Van Duysen and Diller Scofidio + Renfro, Georg Baldele. These iconic and popular designs have been updated with the latest lighting industry technologies. The chandeliers now feature lead-free Advanced Crystal components and the latest LEDs, making them more sustainable.

For more information on Swarovski Crystal Palace please contact crystalpalace@swarovski.com.

Swarovski Crystal Palace began in 2002 as an experimental platform to enable design luminaries to explore the boundaries of lighting design through the emotive medium of cut crystal. The project quickly evolved into a fascinating journey of discovery and an incubator for new ideas, following collaborations with more than 60 designers over 15 years, including Zaha Hadid, Yves Behar, Tom Dixon, Ross Lovegrove, Arik Levy, Tokujin Yoshioka, Ron Arad and Gaetano Pesce.

CUSTOMIZED PRODUCT SOLUTIONS

CUSTOMIZED SERVICES AND OFFERINGS

You have the right idea – we provide the right product. Within the Swarovski crystal assortment and with the technical expertise of the company, our support options for your design concepts are almost limitless. Our aim is to make you and your product unique.

Swarovski's Customized Product Solutions Services are designed to realize your very specific design visions by going beyond Swarovski's tremendous standard assortment of crystal components and forward integrated elements.

CRYSTAL COLOR AND EFFECT

If you are missing a specific colour or effect within the standard assortment of lighting elements we offer options to create individual new combinations.

SHAPE AND SIZE

New shapes that perfectly match your product design will get you one step ahead of the competitors.

New cuts for crystal elements are the master class of crystal craftsmanship. In that respect Swarovski is definitely your partner of choice. Our experts look back on more than 120 years of experience.

Still missing a specific dimension in one of our standard crystals? We may be able to help you there, seeing that size alterations are easily possible in most cases.

LOGO AND MOTIF

Your products make the difference – let us make the difference on your products! Be your own designer and add your personal signature, motif, or statement to the crystal surface, using exclusive techniques.

PRINTING

For the ultimate in personalized crystal design there is the possibility to print any motif onto crystals by means of inkjet, screen-, or pad-printing technology.

LASER & ENGRAVING

Choose your favorite crystal and personalize it with the help of laser engraving, either inside the crystal, at the top or reverse side. Did you know that laser marking on metal surfaces is also an option?

CRYSTAL STRANDS

IMPORTANT NOTICE

Crystal Strands are intended for DECORATIVE USE ONLY. Because of their unique physical properties, Swarovski crystals are not suitable for use in applications that consist of free-flowing strands and bring the crystals into contact with one another, which could damage them (such as functional curtains, partitions, stage decorations, etc.). It is up to the client to assess whether the strands are suitable for use in the intended application. The application, use and processing of these products are solely the responsibility of the client, who agrees to defend and indemnify Swarovski, as well as hold Swarovski harmless from any and all claims by third parties based on product liability or otherwise relating to uses of Swarovski products the client has purchased, and waives all claims of its own. Please read instructions and warning notices in the Price List and the Swarovski Application Manual.

For customized varieties of Crystal Strands, please contact your local sales office.

LINE UP FOR NEW IDEAS

Achieve an intense and complex look with a simple technique: Crystal Strands from the Swarovski Architecture & Lighting Collection have long become a design darling among creative minds throughout the world – from architecture to interior, as well as set and stage design.

With a large variety of colors, effects, and shapes strung together in trickling, sparkling rows of crystal, Crystal Strands provide an endless source of inspiration for spectacular 2D and 3D installations.

ALL ALONG THE LINE

Enjoy a whole world of design ideas: smart pinning technology allows for countless application possibilities, ranging from small highlights to lavish ornamentation and from subtle light spots to genuine eye-catchers. Combine different shapes, materials, and lengths to realize your own creative vision.

ENDING VARIETIES

Standard Stainless Steel Crystal Strands are available with two different endings: Loop and open ending.

ARCHITECTURE PROJECTS

TAYLOR MADE SOLUTIONS

For every idea there is a solution, and Swarovski knows how to find it: A dedicated team of industry experts offers 360° support to clients – from product design to manufacturing and installation assistance.

UNIQUE SERVICE FROM LIGHTING AND INTERIOR SPECIALISTS

We combine our understanding of the power of crystal and light with a solid know-how about the specific needs of the industry that we developed by working since decades on many high-end projects. We create stunning bespoke designs, develop new and unprecedented application techniques and offer comprehensive support throughout the entire duration of a project: from planning and purchasing to project management and creation, ensuring flawless implementation in the end.

With the help of the collective creative competence offered by Swarovski, our expert team of architects, lighting planners and technicians, interior designers, product designers and engineers transforms crystal into premium decorative lighting elements and solutions, – from crystal stairs to wall partitions. Following your creative vision, unique architectural elements are tailored to their surroundings, be it by means of skillful modification of existing products or by inventing something entirely new.

VIAREGGIO, ITALY

PRODUCTS

Bespoke Swarovski Circles

PROJECT INFORMATION

Italian luxury yacht builder Rossinavi partnered with Arrabito Naval Architects and expert designer Enrico Gobbi of Team for Design to build a sleek 48 m luxury motor yacht, known as project Ketos. To complement their luxurious design intent, Swarovski added sparkle to this leisurely experience at sea.

HYATT REGENCY DUBAI CREEK HEIGHTS

DUBAI, UAE

PRODUCTS

Swarovski Classic Panels

PROJECT INFORMATION

The Hyatt Regency Dubai Creek Heights is the fifth Hyatt-branded hotel in the city. The 464-room hotel offers distinctive design features, including a spacious lobby filled with 1,000 square meters/more than 3,200 square feet of plant walls, flowers and greenery, along with soothing water features and a towering glass ceiling embossed with Swarovski crystals. The open-to-the-sky view helps to bring the outdoor space into the heart of the hotel and illuminates the interior with the city's year-round sunshine.

MARIINSKY THEATRE

ST. PETERSBURG, RUSSIA

PRODUCTS

Custom Crystal Art Piece, Crystal Strands and Crystal Compound Panels

PROJECT INFORMATION

Here, Swarovski brought to light numerous awe-inspiring crystal lighting applications with over 130,000 Crystals from Swarovski®. The VIP box contains a custom Art Piece made with over 17,700 Crystals from Swarovski®. In the auditorium, over 260 Swarovski Crystal Compound accent lights are studded in the balcony fronts and over 7,455 stainless steel crystal strands drape the main lobby area, flawlessly displaying the special symbiosis of crystal with light.

SEAL YOUR SUCCESS

BE PART OF OUR EXCLUSIVE INGREDIENT BRANDING PROGRAM
SWAROVSKI-PROFESSIONAL.COM

SWAROVSKI

TO PREDICT THE FUTURE,
WE INVENTED IT.

Stay ahead with our Advanced Crystal. It is lead-free* and helps
you to reach full compliance with current laws and regulations.

*Crystal glass and all other materials containing 0.009% lead or less.

SWAROVSKI

WHY SWAROVSKI

EXCELLENCE, THROUGH INNOVATION AND ORIGIN

PLATINUM* PRO
Using its vast research and technological capability, Swarovski has set a new standard in the lifespan of crystals with its new advanced Platinum Pro foiling technique.

Platinum Pro is not only resistant to environmental damage from chlorine, salt water, and perfume—it can also withstand processes such as soldering and electroplating, giving it unprecedented durability.

PREMIUM, BY SERVICE AND DESIGN

DESIGN SERVICE
With its international reputation for creative excellence, Swarovski is at the forefront of design innovation across the world, offering exceptional service provided by the

industry's best creative talent. Throughout a global network of Design Centers, highly experienced teams provide first-class creative direction encompassing trend research, design, technical design, and consulting. It is Swarovski's thoroughness, together with its passion for design, which makes it successful in translating customer requirements into creative commercial proposals.

GLOBAL SERVICE
Swarovski sells its products in over one hundred countries. Committed to providing dedicated personal assistance, Swarovski structures its operations around a global

sales force supported by Customer Care Centers with a deep understanding of local markets. Through its collaborations with certified Application Partners, Swarovski provides a worldwide Production/Application Network to its customers. Likewise, Swarovski's customers profit from its creative direction, from very specific modular aspects to fully comprehensive solutions.

APPLICATION SERVICE
Swarovski's comprehensive range of Technical Services delivers customized technical crystal application support, aiming for finding a realizable and suitable

solution for our customers. The service is built up on our comprehensive crystal application expertise of all relevant application techniques, our technical Swarovski product knowledge, our process engineering competences and crystal application equipment experiences linked with product manufacturing knowledge of various industries.

DESIGNER EDITIONS
Beginning with Christian Dior in the 1950s, and continuing with today's top designers and brightest rising stars, Swarovski is proud of its long history of creative collaboration with artists, artisans, and designers from all areas of jewelry and fashion. Crystal has long been a dynamic source of inspiration for creative minds—enchanted by its myriad design possibilities, their visionary ideas are transformed into exclusive cuts and unique designs for Swarovski crystal.

COMPLIANCE, WITH INTEGRITY

ADVANCED CRYSTAL
Swarovski's patented lead-free** formula has changed the DNA of crystal while still offering the same sparkle, dependability, and variety for which Swarovski is famous.

If you haven't noticed a difference, that's probably because when it comes to the Advanced Crystal standard it's what you don't see that matters. Carefully selected raw materials are made into products compliant with crucial current laws and regulations governing the use of certain substances in finished products in the most relevant segments of Swarovski's customers' businesses. Swarovski's new and innovative formula offers peace of mind for business partners in the ever-stricter international regulatory environment.

COMPLIANCE SERVICE
Through worldwide legal monitoring and customer requirements, it is noticed that the amount of laws and regulations is getting more and more complex. To help the customer to keep an overview and to receive compliant and safe products, Swarovski is offering the unique Compliance Service. The service includes assessments and evaluations regarding substance limitations (Restricted Substance Lists) as well as conformations and certificates of compliance of Swarovski products to our customers' requirements.

CLEAR
Swarovski's internal compliance program, called CLEAR, summarizes the chemical requirements of the most critical laws and regulations regarding the restriction and prohibition of substances in its customers' most relevant product segments. These particularly include jewelry and accessories, textiles, interiors, packaging, electronics, and children's products. The program and its guidelines are subject to regular legal monitoring. Likewise, Swarovski requires all suppliers to fully declare their raw materials and to take part in the CLEAR program. CLEAR provides customers with the comfort of trust that all products have undergone a reasonable testing program and are found to comply with their requirements.

* Silver mirror coated with a platinum colored protective layer
** Crystal glass and all other materials containing 0.009 % lead or less.

COLLECTIONS

Swarovski is the leading manufacturer of precision-cut crystals that are used in the fashion and jewelry industries as well as in the world of lighting design, architecture, and interiors. Crystals from Swarovski have become an indispensable material for the creations of international designers. Swarovski sells its loose and forward-integrated crystals to the worlds of fashion and design under the product brand Swarovski. This collection provides a complete overview of the whole Architecture and Lighting product range. All product information is also available online, on our business website SWAROVSKI-PROFESSIONAL.COM. A dedication to perfection and innovation has been a cornerstone policy of the company since its foundation in 1895. This pursuit of excellence includes Swarovski’s commitment to trend research, which results in the creation of trend-relevant crystal cuts as well as new colors and effects. These innovations and seasonal line extensions are featured in comprehensive launch communication packages. Dedicated to remaining the world leader in precision-cut crystal, Swarovski also offers its customers segment-specific collections and customized product solutions as well as trend support and application services. For more information concerning Swarovski products, services, and sales materials, please contact your local Swarovski sales office.

ORDERING

Please contact your nearest Swarovski sales office to order products. Registered customers also have the convenient option to order online via the e-commerce service of b2b.ecommerce.swarovski.com. In addition to providing an online ordering facility, the website also includes valuable product information, availability, delivery details etc. Contact your Swarovski sales office to register for this service.

APPLICATION INFORMATION

Thanks to their outstanding quality and with the help of specially developed application techniques, Swarovski products can be processed easily and quickly to produce high quality results.

The Application Manual provides in-depth information regarding all current application techniques and the technical services provided by Swarovski. It contains detailed illustrations and instructions for correct soldering, plating, gluing, Ceralun™, sewing, embroidery, Hotfix, and mechanical application as well as useful care instructions and information about the required machines, tools, and aids and their suppliers. The manual is available in various international languages.

All detailed and up-to-date information regarding the Application Manual is also available as a free download on our business website SWAROVSKI-PROFESSIONAL.COM. The application techniques are demonstrated in animations and videos.

For specific questions regarding the application techniques, please contact your local Swarovski sales office.

SIZES

Various measurement abbreviations are used to classify the components.

 **PP, SS**
Pearl Plate (PP), Sieve Size or Stone Size (SS) for round crystals. Please also refer to the conversion table located at the back of the collection (“Open to See Sizes”).

 **mm**
Metric measurement in millimeters.

 **m**
Lenght of Strands is measured in meters.

COLORS & EFFECTS

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison.

Special color cards for several product groups are located at the beginning of the chapters.

EFFECTS

Vacuum Coating Effects

Vacuum coating processes on the surface of the crystal produce either a special surface or a translucent effect, according to the application methods used.

Please find below a list of all Swarovski effects followed by an explanation of the special vacuum coating processes.

Surface Effects

(Vacuum coating on the surface of the crystal)

	Effect Code	Name
	ANTP	Antique Pink
	API	Astral Pink
	BLAB	Blue Aurore Boreale
	BLSH	Blue Shade
	BRSH	Bronze Shade
	CAL	Comet Argent Light
	COP	Copper
	DOR	Dorado
	GSHA	Golden Shadow
	HEM	Hematite (only on Jet)
	IRIG	Iridescent Green
	LTCH	Light Chrome
	LUMG	Luminous Green
	METSH	Metallic Sunshine
	MOL	Moonlight
	NUT	Nut (only on Jet)
	PARSH	Paradise Shine
	ROGL	Rose Gold
	SAT	Satin
	SSHA	Silver Shade

Translucent Effects

(Vacuum coating on the reverse side of the crystal, effect shines through the transparent crystal)

	Effect Code	Name
	BBL	Bermuda Blue
	HEL	Heliotrope
	SINI	Silver Night
	VL	Vitrail Light
	VM	Vitrail Medium

Patina Effects

(Partial coating of the correspondingly modified effects)

Effect Code	Name
BLAPA	Black Patina
GOLPA	Gold Patina
ROSPA	Rose Patina
SILPA	Silver Patina
WHIPA	White Patina

PA (Patina)

Innovative technology allows for the partly coated application of adapted effects. Its historical edge and “used” look give it a certain timelessness, without losing its crystalline appearance.

Variations on Surface Effects

	2x	Both sides of the stone are treated with an effect.
	B	Effects on three sides of a cube shape.
	V	The effect is used in reverse. A surface effect is used like a translucent effect.
	Z	Only a part of the stone is treated with an effect.

CAL ‘V’SI & CAL ‘VZ’SI

The effect CAL (Comet Argent Light) is also used as a mirror coating on the reverse side of the crystal in special cases.

/G

Article with partly (PF) or fully frosted (FF) surface.

Special Surface Effects

Swarovski has been able to achieve various special surface effects by using special chemical and mechanical processes on the surface of the crystals.

	Effect Code	Name
MAT	MAT	Matt Finish

The Matt Finish effect is achieved by performing a chemical matting process on the entire surface of the crystal. Small variations in the size of the articles may occur as a result of this chemical process.

FOILING

Foiling is the process of mirror coating the reverse side of the crystals.

Platinum* Pro Foiling (F)

A silver mirror finish that is coated with a platinum colored protective layer of highest quality. The Platinum Pro Foiling is not only resistant to environmental damage from chlorine, salt water, and perfume – it can also withstand processes such as soldering and electroplating, giving it unprecedented durability. Available on request.

CUSTOMIZED SOLUTIONS

Swarovski offers customized solutions in addition to the standard collection**.

The following customized solutions are available:

- Standard articles in non-standard colors and effects
- Standard articles with motifs/prints
- Customized product development for CE and FIE (with regard to cut/sizes)
- Customer-specific modifications of catalog articles with regard to color/effect/print

CLEANING RECOMMENDATION

Crystal

No special care is required for cleaning Swarovski crystals. If your crystals are covered by a thin layer of dust, you can reach perfect results by simply dusting them off with a dry, antistatic cloth. We recommend wearing white cotton gloves when handling crystals, to avoid leaving fingerprints on the surface.

If your Swarovski crystals are covered in larger amounts of dust or dirt we recommend using lukewarm water with a few drops of mild dish soap. Never use harsh, corrosive or abrasive cleaners, detergents containing acetic or citric acid, solvent-containing cleaning agents or other chemicals. Avoid using glas or window cleaners, as they tend to leave streaks.

KNOBS AND HANDLES

Special protective layer (Prolay)

The protective layer is a lacquer system, which is applied over the reflective layer of the crystal and completely envelops the reflective surface. On one hand the protective layer increases the reflective coating´s resistance to wear and tear against scratches and damages and on the other hand it prevents moisture, cleaning agents etc. from coming into contact with the reflective coating, which could corrode and damage the reflective coating.

Application of the crystal components

Due to the metallic composition of the coating, please ensure that the coating is fully covered with the glue when applying the crystal components. Otherwise the vacuum coating could corrode as a result of various liquids or cleaning agents.

For technical reasons, special productions may be subject to a minimum order quantity, while standard articles are available as individual packs. Please note that special productions may be subject to individual delivery times.

For more information and consultancy regarding special productions, please contact your local Swarovski sales office.

Use a microfiber cloth or a soft, lint free, absorbent cotton cloth. Dampen the cloth in the prepared lukewarm water and wring it out thoroughly. Then, gently clean each Swarovski crystal wiping from top to bottom and dry it with a clean cloth to achieve perfect brilliance.

Metal components chrome, gold-plated

Always use soft, lightly dampened cloths or leather rags to clean metal components. Make sure to thoroughly dry all parts after use or cleaning. For more difficult stains we recommend adding a few drops of white spirit or a skin-friendly cleaning agent to lukewarm water and patting the spot dry with a soft, lint free cloth after cleaning.

LAWS, REGULATIONS, NORMS & STANDARDS

The composition of loose and forward-integrated crystals in the Advanced Crystal standard is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances for finished products in the most relevant segments of our customers’ business.

WARNING NOTICES

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow, or insert the crystal into their noses. Magnetic products with crystal applications pose a particular risk of serious intestinal injury if ingested. The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose to small children. Failure to follow Swarovski’s care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Crystal Strands

Crystal Strands are intended for DECORATIVE USE ONLY. Because of their unique physical properties, Swarovski crystals are not suitable for use in applications that consist of free-flowing strands and bring the crystals into contact with one another, which could damage them (such as functional curtains, partitions, stage decorations, etc.). It is up to the client to assess whether the strands are suitable for use in the intended application. Due to technical reasons the effective length can vary from strand to strand. Any extension, enlargement, adaptation or other change of strands (in whatever form) is not permitted. The application, use and processing of these products are solely the responsibility of the client, who agrees to defend and indemnify Swarovski, as well as hold Swarovski harmless from any and all claims by third parties based on product liability or otherwise relating to uses of Swarovski products the client has purchased, and waives all claims of its own. Please read instructions and warning notices in the application manual.

Warning for Magnetic Products

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Magnetic products with crystal applications pose a particular risk of serious intestinal injuries if ingested. For each application of magnetic crystal products, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards and assess any risk it may pose to small children.

Further information is available on the internet at SWAROVSKI-PROFESSIONAL.COM

Warning for Tableware

The application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand. The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users. The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible for complying with these country-specific provisions and shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products, and waives all its own claims against Swarovski.

Unsuitable Applications

Crystals from Swarovski are intended for use in the fields of fashion, jewelry, accessories, textile products, and for interior décor. Due to their physical properties, crystals from Swarovski are unsuitable for other uses (e.g. gluing onto teeth, using on or near mucous membranes, and other unsafe uses). The customer shall defend, indemnify, and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products purchased by the customer, and waives all its own claims.

Responsibility of User

Any oral, written, or test-based advice that Swarovski provides regarding techniques for the application of its products are recommendations based on Swarovski’s current knowledge and the information provided by its suppliers. Such advice does not discharge the customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use, and processing of these techniques and products are solely the user’s responsibility.

* Silver mirror coated with a platinum colored protective layer.
** Available to all our customers. Availability of special productions may be limited by technical feasibility and if our Terms and Conditions are applied.
